15th
Anniversary Faculty of
PUBLIC HEALTH

Message from the Rector

of Thammasat University

Upon celebrating the 15th Anniversary of the Establishment of Faculty of Public Health, I have witnessed remarkable achievement of the faculty toward becoming a leading academic institute in public health studies and taking a key role in continuously producing well-equipped graduates with knowledge and virtue to serve the society in all aspects.

Starting from 2015, the Faculty of Public Health began to adopt Education Criteria for Performance Excellence (EdPEX) as framework to further improve its organizational management quality. Later in 2019, the Faculty of Public Health took part in TU-EdPEX200 organized by Thammasat University with aim to encourage and support five internal organizations joining the program by enabling them to pass EdPEX200 evaluation criteria. In addition, the Faculty of Public Health participated in the 7th EdPEX organized by Office of the Ministry of Higher Education, Science, Research and Innovation. In 2019, a total of 20 organizations were selected through preliminary screening. Among this was the Faculty of Public Health which also made it to the SAR round, marking the first time in history that an organization under Thammasat University had joined the program and had been selected during preliminary screening.

Throughout the past year, Thailand has faced numerous problems namely COVID-19 pandemic, causing adverse economic, social and political impacts, as well as immense changes in our day-to-day lifestyle. Organizations nationwide have implemented strict protocols to control the spreading of the disease as much as possible. The Faculty of Public Health has constantly played a vital role in resolving this issue such as by raising public awareness on COVID-19 prevention and promoting public health, both on and outside of campus, including continuously organizing campaigns with Thammasat University for three consecutive years to promote public safety on the use of helmet while riding a motorcycle.

In addition to its outstanding performance in terms of academic, organizational management quality, and public services, the Faculty of Public Health is also recognized for its continuous development of learning process, conducting well-acclaimed researches, providing academic services for communities and society, as well as promoting art and culture. Furthermore, numerous researches have been widely published in both national and international academic journals not to mention education network expansion through MOU signing with various agencies, organizations and leading academic institutions. This has not only made the Faculty of Public Health to become widely known to the public but also allowing Thammasat University to earn its recognition as an academic institution for the people.

Finally, I would like to express my gratitude to the dean and executive team for their outstanding management performance, including instructors, academic support team, students and alumni of the Faculty of Public Health for their continuous support in driving the success of our missions as well as achieving the policies and goals of our university.

(Assoc. Prof. Gasinee Witoonchart)
Rector of Thammasat University

Message from the Dean

of the Faculty of Public Health,
Thammasat University

Throughout the past 15 years following the establishment of the Faculty of Public Health, Thammasat University, we have overcome countless strategic challenges resulting from the country's transition toward 21st century education and the implementation of new economy development policy as well as Thailand 4.0 policy. Our key role is to produce graduates well-equipped with the skills and capacity for handling the current changes. Bearing this in mind, we are devoted to continuously perform our work in every aspect in accordance with the policies, missions, and strategic plans set out by the university. This includes producing graduates with GREATS characteristics, conducting researches and creating innovations capable of promoting social development changes, building collaboration network at both national and global levels, focusing on improving quality of academic and public health services toward reaching global standard, and promoting stability and sustainability through modern management.

In 2020, the faculty has revised its curricula for Master Degree program and Master of Science program in Health Management and Environmental Health and Safety Management, which is a special program offered at Rangsit Campus and which consists of study in the following majors: Environmental Health and Occupational Health Management, Health Management and Sustainable Development, and Public Health Information Management. In addition, Master of Public Health program in Public Health and Sustainable Development (MPH SusDe-Desus) and Doctoral of Public Health in Public Health and Sustainable Development (Dr.P.H. SusDe-Desus) mainly focuses on the integration of science, health, social and management studies to provide students with more comprehensive view of the subject by taking into account sustainable development for the future.

In addition, the Faculty of Public Health focuses on integrating various sciences through student-centered learning approach which urges students to think, analyze and conduct researches while participating in creative activities. Here, we place great emphasis on active learning to encourage students in applying the skills and knowledge learned in solving real-life problems and even in their future career. Hence, various teaching methods were applied in designing active-learning lesson plans and activities to promote classroom participation among students, including enabling them to produce researches and innovation through well-acclaimed researches, both national and international levels, conducted by other professors and fellow students. Also, various activities under the concept of GREATS student were organized in hope to foster competent graduates with keen sense of leadership and capable of handling current changes by appropriately applying the knowledge learned.

Upon concretely adopting Education Criteria for Performance Excellence (EdPEX200) developed by Office of the Ministry of Higher Education, Science, Research and Innovation, the faculty hopes to drive exponential development of education quality in the future. Meanwhile, "Public Health Alumni Association" shall further be strengthened to act as a key player in driving the development and support of successful operations of the faculty.

Lastly, I would like to thank you the executive team, instructors, academic support team, students, and alumni for their continuous support in driving successful operations, as well as external luminaries for their helpful guidance in ensuring that all related policies and missions are successfully delivered.

(Assoc. Prof. Dr. Sasithon Theptrakanphon)
Dean of the Faculty of Public Health

About us

Vision

To become a leading academic institute in public health among ASEAN countries

Core Competency

Knowledge integration to promote academic and public health innovation development

Philosophy

“Faculty of Public Health for society”

Mission

- 1) Produce public health graduates of professional excellence, leadership and creativity
- 2) Generate research and bodies of knowledge that is up-to-date and in line with current public health issues
- 3) Promote good health, safety and well-being at local, national, and global level of society

Core Value

- G** - Global Mind-set (keep up with current global public health issues)
- R** - Responsibility (responsibility toward public health profession)
- E** - Eloquence (effective communication and technology utilization)
- A** - Aesthetic Appreciation (holistic healthcare knowledge)
- T** - Team Leader (leader in public health with ability to collaborate with other fields of study)
- S** - Spirit of Thammasat (demonstrating social responsibility)

Bachelor's Degree

In education year 2019, the Faculty has revamped 5 bachelor's degree programs as follows;

- 1) Bachelor of Science Program in Public Health (Rangsit Campus)
 - Major in Occupational Health and Safety
 - Major in Environmental Health
 - Major in Health Promotion
- 2) Bachelor of Science Program in Occupational Health and Safety (Rangsit Campus and Lampang Campus)
- 3) Bachelor of Science Program in Environmental Health (Rangsit Campus and Lampang Campus)
- 4) Bachelor of Science Program in Innovative Health Promotion (Rangsit Campus)
- 5) Bachelor of Science Program in Community Health (Lampang Campus)

The Total number of students (Bachelor of Science Program) at Faculty of Public Health AY 2019 is 904

Bachelor's Degree Curriculum : Extracurricular Activities

Bachelor's Degree Program Field Trips (Rangsit Campus)

The main focus of our bachelor's degree program is to allow students access to real-life learning experiences as well as ensuring their ability to keep up with current global events and fully understand the nature of their profession. Therefore, several local field trips that are relevant to the subjects studied are provided. In 2019, a total of 24 field trips were arranged for the students at Rangsit Campus as follow:

1. National Health Commission Office, Nonthaburi Province
2. PTT Fire Fighting Training Center, Oil Terminal Saraburi, Saohai Subdistrict, Saohai District, Saraburi Province
3. Better World Green Public Company Limited, Huai Haeng Subdistrict, Kaeng Khoi District, Saraburi Province
4. Safety and Health at Work Promotion Association (Thailand), Talingchan District, Bangkok
5. Charoen Pokphand Foods Public Company Limited, Chonburi Province
6. Thai Yamaha Motor Company Limited
7. Trainings on industrial hygiene, safety, and ergonomics at Sanko Fastem (Thailand) Company Limited, Belton Industrial (Thailand) Company Limited, Navanakon Factory, Inoue Rubber (Thailand) Public Company Limited, and Thammasat University Hospital
8. Bangkok Bang Sue Environmental Education and Conservation Center
9. Bangkok Water Treatment Plant, Metropolitan Waterworks Authority
10. Thai Namthip Company Limited (Pathum Thani Plant)
11. Bangkok Expressway and Metro Public Company Limited
12. Pollution Control Department
13. BLCP Power Company Limited
14. TPI Polene Public Company Limited
15. SCG Experience and Home HEIM
16. Onnut Transfer Station
17. Better World Green Public Company Limited
18. Nonthaburi Provincial Administration Organization
19. Nonthaburi Municipality Residual Treatment Station
20. Energy Complex Company Limited
21. Si Mum Muang Market
22. Path2Health Foundation, Thai Health Promotion Foundation
23. Thai Health Center, Thai Health Promotion Foundation
24. Community survey on changing healthcare trends at Thumkraben District, Samut Sakorn Province
25. Community survey on health promotion practice at Ban Toei Sufficiency Economy Model Learning Center located at Moo 1, Krabuengyai Subdistrict, Phimai District, Nakhon Ratchasima Province

Bachelor's Degree Program Field Trips (Lampang Campus)

Field trip at Electricity Generating Authority of Thailand, Bhumibol Dam, Sam Ngao District, Tak Province, to observe occupational health and safety management.

HC332,HC371 course field trips at Wiang Yong Subdistrict Health Promotion Hospital in Lamphun Province.

Occupational Medicine course field trips at Universal Food Public Company Limited (Lampang Plant) and Distribution Center (CP ALL) RDC Lamphun to observe industrial risk management and health promotion practices.

OC351 Basic Engineering for Industrial Hygiene course field trips at Thai Nam Thai Company Limited and

Environmental health program students visited Air Quality Monitoring Station located at Phra Bat Subdistrict, Muang District, Lampang Province.

Field Training (Rangsit Campus)

Field trainings are provided as part of Bachelor's Degree program to give students the opportunity to gain real-life experiences by applying the knowledge and principles learned in class on the topics of occupational health and safety, environment health, and health promotion during field trainings at the selected industrial plants, municipality offices, and hospitals. In addition, students are expected to develop some essential skills namely problem-solving, critical thinking, planning, and teamwork.

Field Training (Lampang Campus)

Field trainings provided as part of Community Health course consist of Field Training (Aor.Mor.Chor.491), Community Health Training (Aor.Mor.Chor.492), Physical Assessment and Basic Medical Care Training, and Participatory Research for community health impact assessment (Aor.Mor.Chor.401). During their field trainings, students will be assigned to different locations, namely Koh Kha Community Hospital, Ngao and Thoen, and nearby villages, to conduct research for a total period of 3 months with aim to develop skills and knowledge on community health.

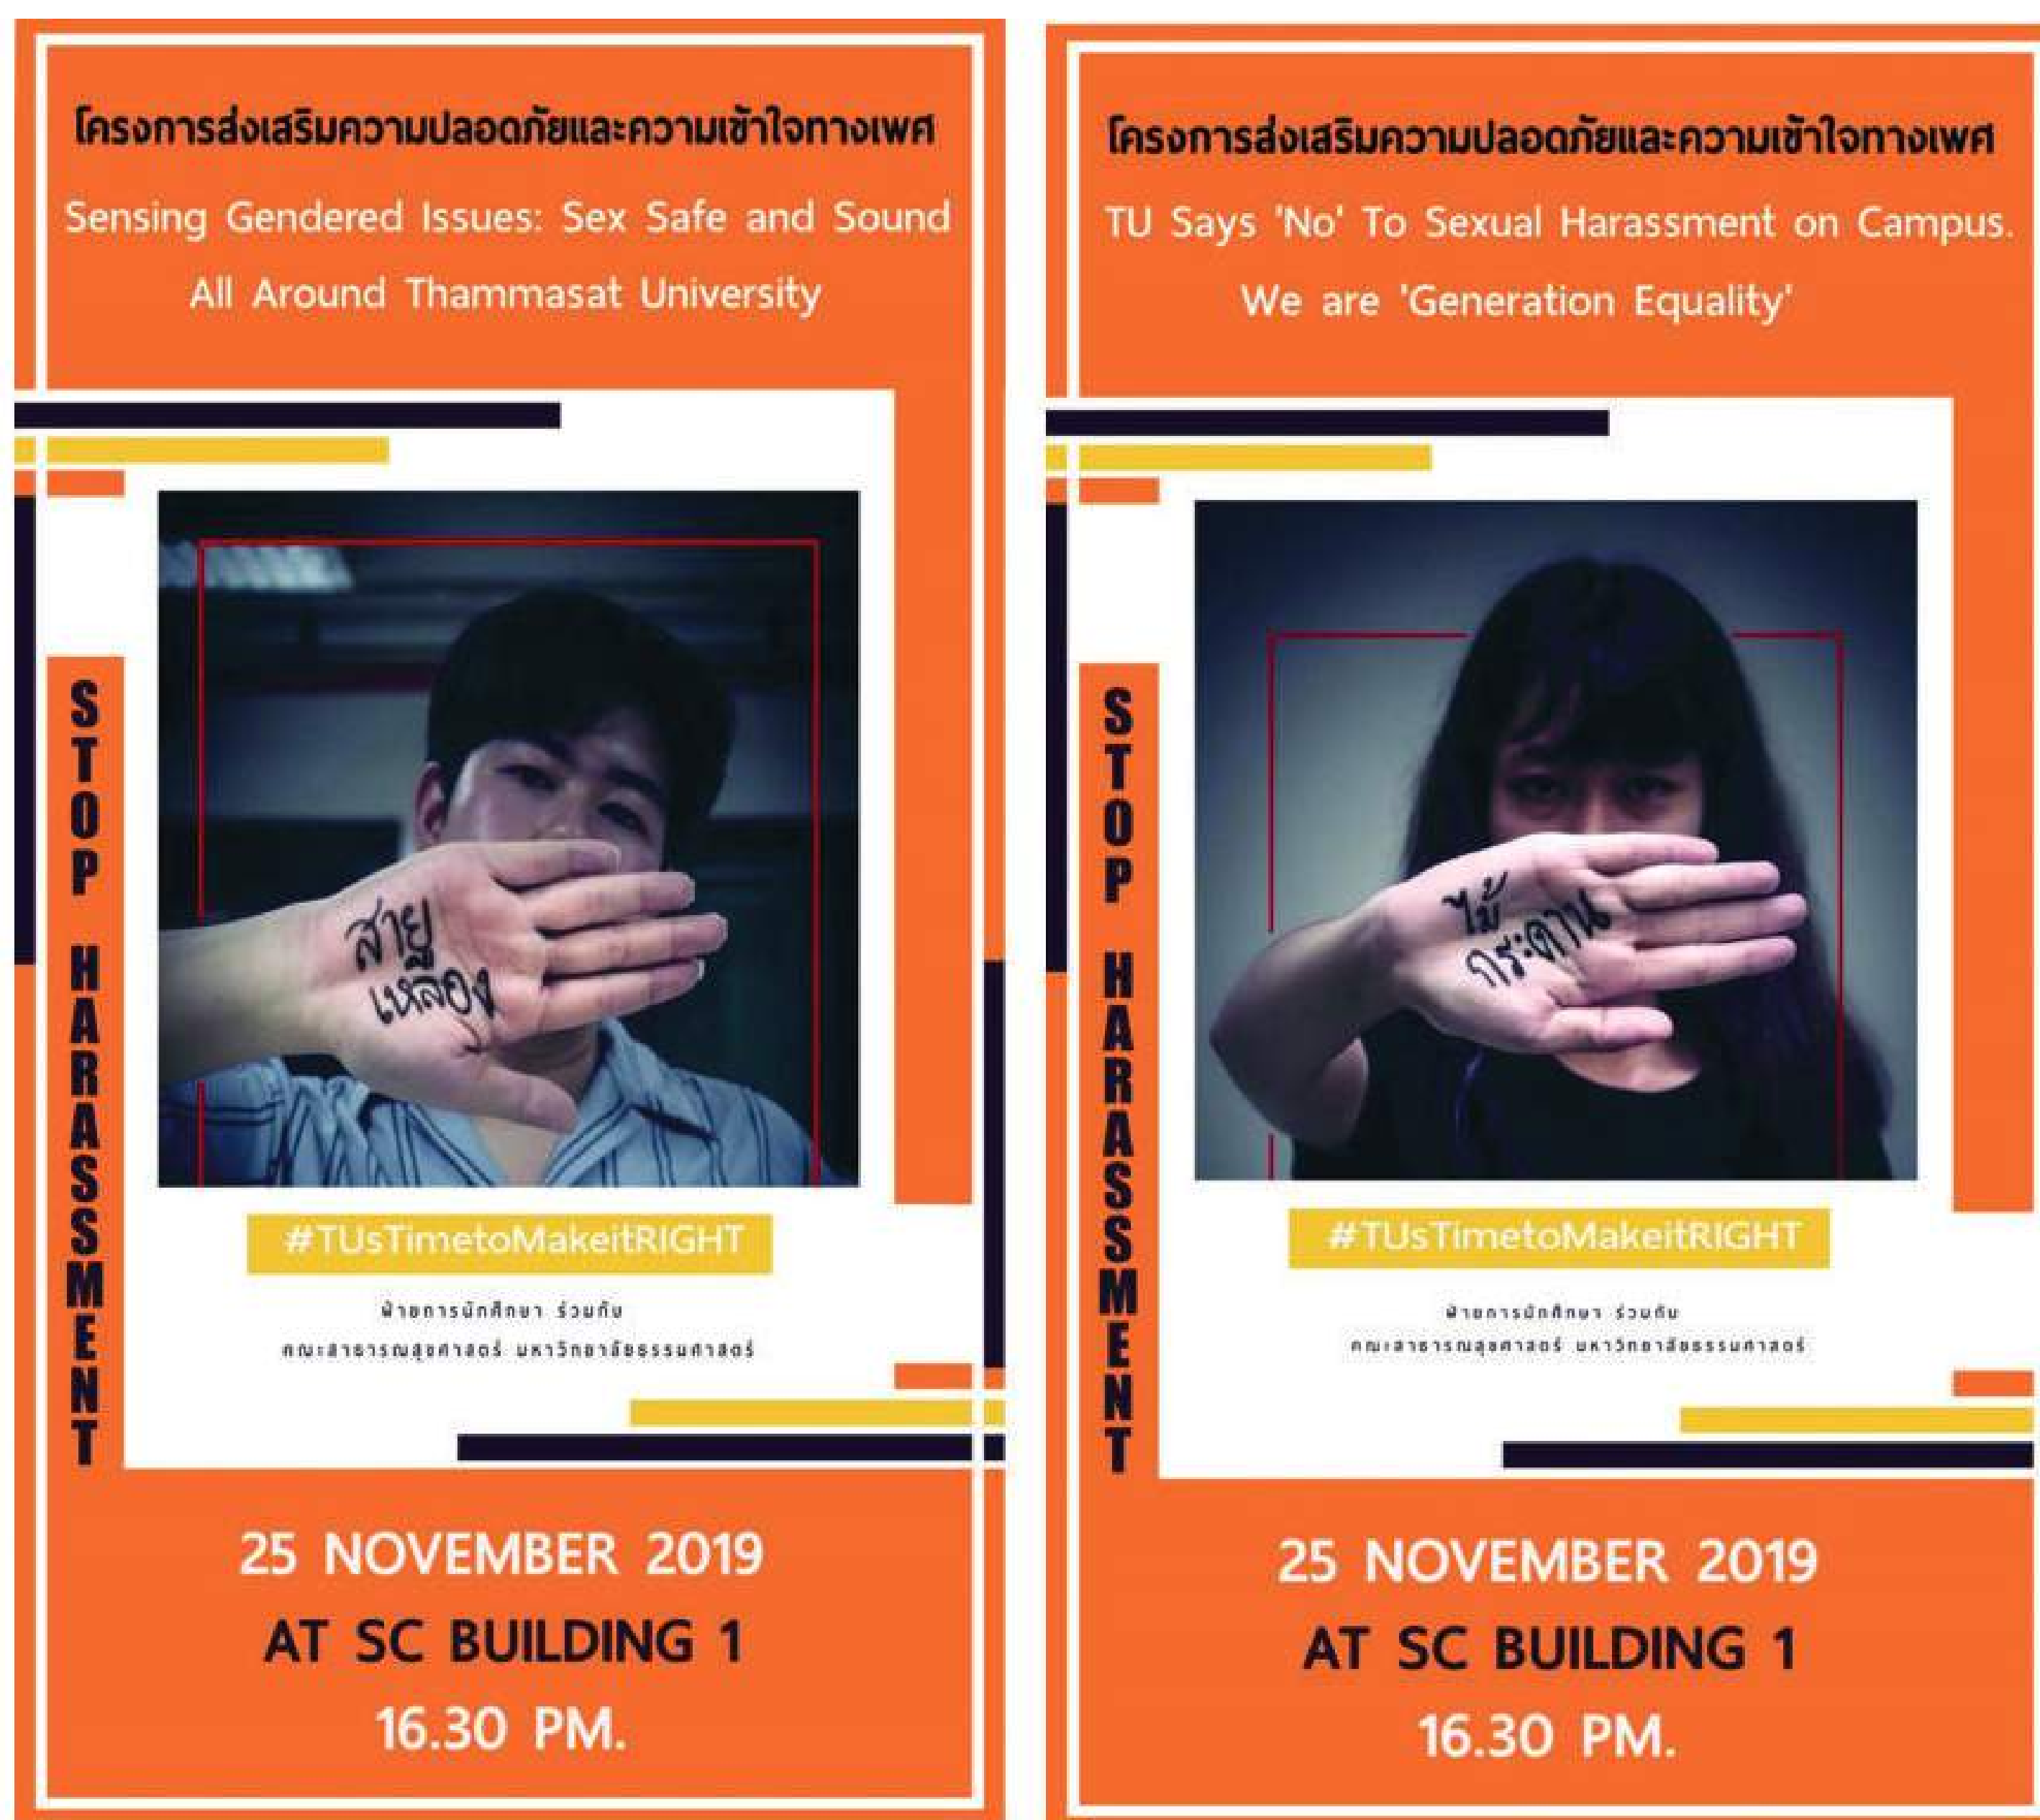

Students visited CPRAM Company Limited to conduct water hardness analysis and Italian

Thai Development Public Company Limited to conduct sound measurement of the belt.

Academic Skills Development Activities

Activities for Promoting Academic and GREATS Skills Integration

Bachelor's Degree Program (Rangsit Campus)

Promoting Gender Safety and Understanding through “Sensing Gendered Issues : Sex Safe and Sound All Around TU” Activity

Senior students of health promotion major organized an activity to promote gender safety and understanding under the concept of “Sensing Gendered Issues : Sex Safe and Sound All Around TU”. Organized as part of health promotion project requirement, this activity was greatly supported by Student Affairs Division, Thammasat University, and also caught the university’s attention as it is a crucial matter that needs to be addressed immediately.

Sexual Harassment on Campus and in the Society

Kulsatri Magazine April 2019 edition published a discussion panel on “Lerk Rook Khukkham” (“confront and combat harassment”) which is an activity organized by senior students as part of health promotion project under the Safe University, Safe Space for All initiative funded by ActionAid Thailand with aim to find concrete solutions to stopping sexual harassment on campus.

Pak Mood Jood Phueg Activity

Health promotion major students together with Women’s Health Division, Thai Health Promotion Foundation, and HP481 course initiated Healthy City activity under the name of “Pak Mood Jood Phueg” through project-based learning with aim to empower the students, raise safety awareness, and foster public service mind.

Season Market 2019 – Healthy Factory

Organized under the concept of “Depression is Closer Than You Think”, the event consisted of several activities including Thammamat Music Contest 2019, Healthy Factory, and activities to raise awareness on the importance of having healthy mind and body, as well as building better understanding on factors affecting mental health. Also, the event included a discussion panel and political exhibition.

Bachelor’s Degree Program (Lampang Campus)

“Basic Fire Fighting” Workshop was organized as part of Aor.Chor.441 course from November 23 – 24, 2019.

Industrial Hygiene and Safety Training and Ergonomics Training were organized from October 29 – November 19, 2019 as part of Aor.Chor.461 course to promote academic development.

The 2nd National Environmental Conference on Strengthening Cooperation for Sustainable Development Goals

Senior and junior students attended “The 2nd National Environmental Conference on Strengthening Cooperation for Sustainable Development Goals” to give their oral presentations as part of Research Methodology in Public Health (PB301) course requirement at Mahasarakham University, Mahasarakham Province. The topics presented are as follow:

1. Factors affecting waste sorting behavior
2. A study of food sanitation condition of female cafeteria at a prison located in the central region
3. Determination of the amount of coliphage as index of viral contamination causing gastrointestinal disease in the university’s wastewater treatment system
4. Exposure to Particulate Matter and Health Risk Assessment during Traveling in Different Means of Transport in Bangkok

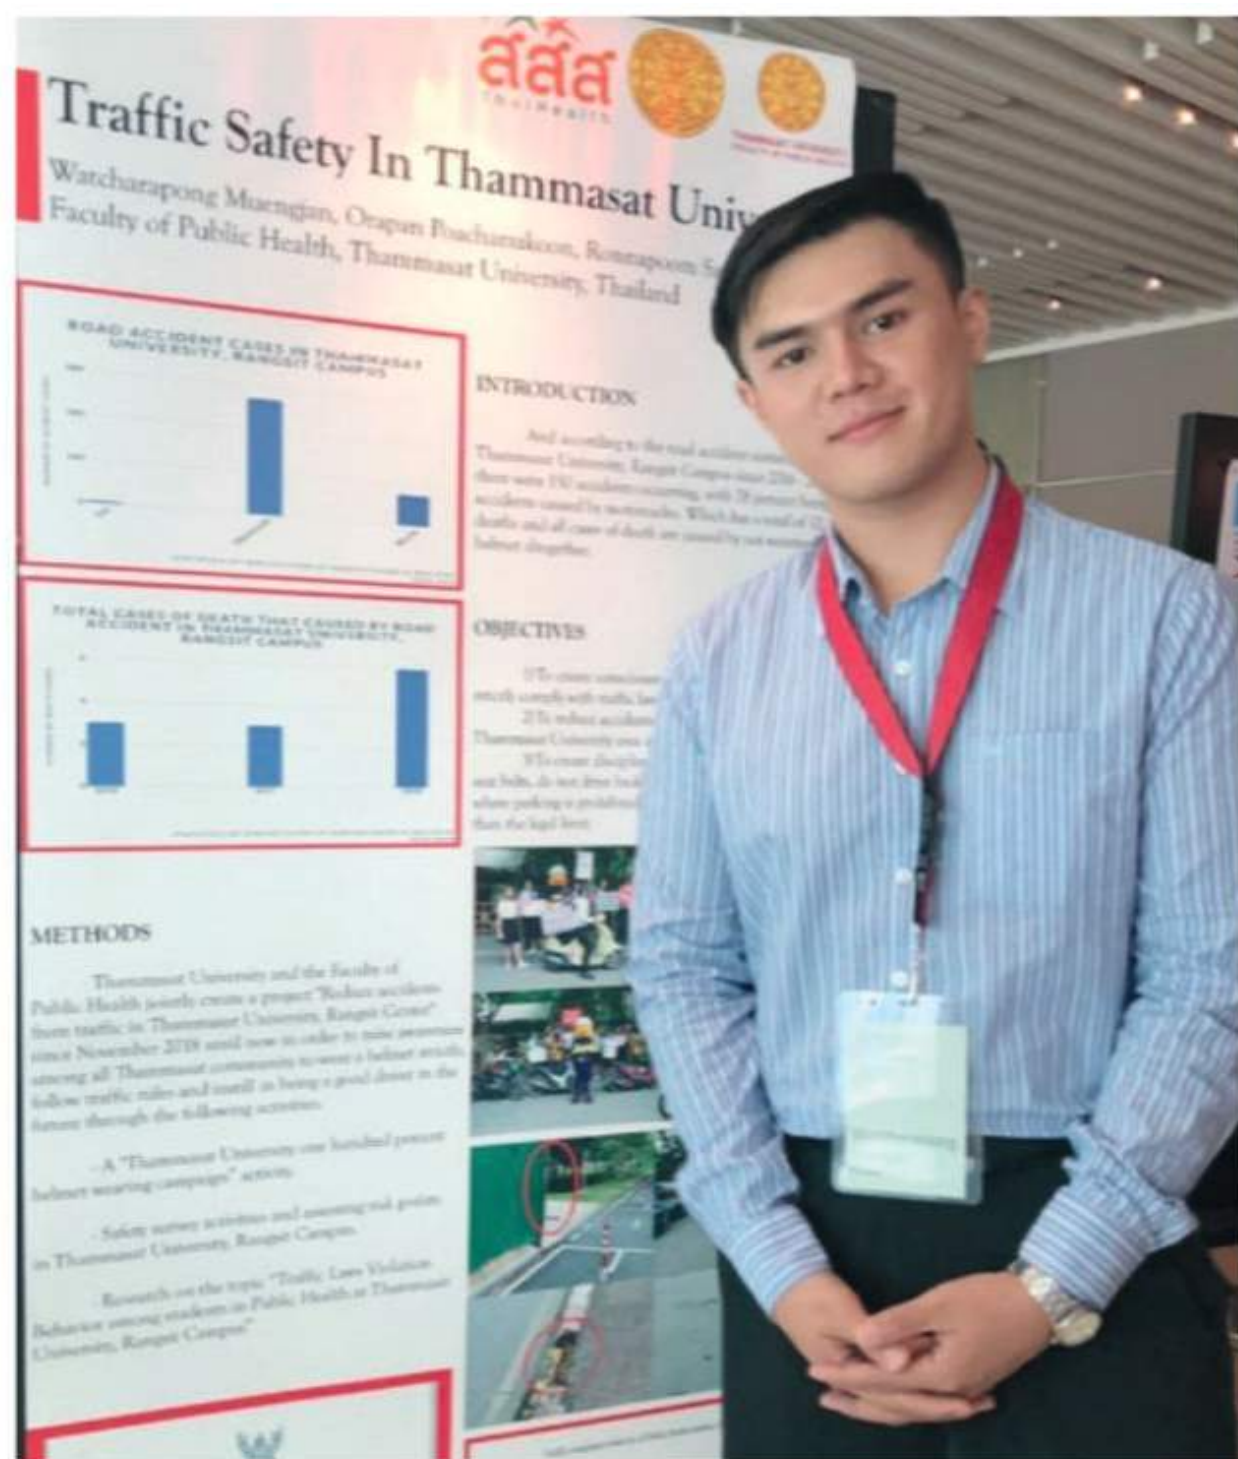

The 18th National Environmental Conference

Senior students of Environmental Health major attended oral presentations on a study of aerosol size, bacteria quantity, and staphylococcus aureus in the air within inpatient unit. The event was jointly hosted by Southeast Asia University, Ministry of Natural Resources and Environment, Ministry of Science and Technology, Ministry of Industry, Ministry of Energy, Pollution Control Department, and Office of Natural Resources and Environmental Policy and Planning.

The 6th Health District Occupational Medicine and Environmental Medicine Conference No. 1/2019

A team of instructors, personnel and students attended “The 6th Health District Occupational Medicine and Environmental Medicine Conference No.1/2019” which was organized under the concept of “occupational health services to prevent the risk of ergonomics problems”. The event also included special talk sessions and exhibitions on occupational health displayed by relevant agencies.

Wai Teen” column in OSHE Magazine, 8th Edition, published by Thailand Institute of Occupational Safety and Health (Public Organization).

Published Works in Magazines

Ms. Pornthipa Charoenphol, Safety Youth Brand Ambassador 2018 and senior student of Occupational Health and Safety major, Faculty of Public Health, Thammasat University, gave an interviewed for “Jor.Por. Wai Teen” column in OSHE Magazine, 9th Edition, published by Thailand Institute of Occupational Safety and Health (Public Organization).

Published Works in Magazines

Ms. Sirirat Ratlertkarn, a student of Health Promotion major, Faculty of Public Health, Thammasat University, wrote an article called “Even If the World is Without ‘Bob’” for drug patients. The article was publicized in Grey Killer published by Thai Health Promotion Foundation as part of Health Talk campaign.

Environmental Management System (ISO 14001) and Occupational Health and Safety Management (ISO 45001) Trainings

Environmental Management System (ISO 14001) and Occupational Health and Safety Management (ISO 45001) trainings were provided to 54 senior students of Environmental Health major and Occupational Health and Safety major with aim to enhance their academic/professional skills and competency outside of classroom. Students are expected to be able to apply the knowledge learned in real-life situation and public health services that will be beneficial to the community and society. The trainings were organized from December 20 – 22, 2019.

Research Presentation at “The 2nd National Conference of Health Science Research 2020”

Senior students of Environmental Health major (Lampang Campus) gave research presentation at “The 2nd National Conference of Health Science Research: Transformation towards Thailand 4.0” organized from January 16 – 17, 2020, at Mae Fah Luang University, Chiang Rai Province, and was awarded under two following categories:

Outstanding Poster Presentation Award for research project titled “A study of the efficiency of the use of sludge from water treatment system in the production of soil cement blocks” by Ms. Parichart Somsanook and Ms. Chatchalai Chanachai.

Good Poster Presentation Award for research project titled “Fluoride removal from water using absorbent made from wastes” by Ms. Nittaya Sithiprom and Ms. Suthasinee Phosri.

Student Affairs

Student Development Activities (Rangsit Campus)

According to student development activities planning for the academic year 2019 (Rangsit Campus), Student Affairs and Arts and Culture Committee organized “Student Activities Planning Seminar 2019” together with Student Committee of the Faculty of Public Health (Rangsit Campus) to develop planning for student development activities that are in line with the respected policies of the faculty and the university which focus on producing graduates with GREATS characteristics. To achieve this, activities/projects organized must be aligned for the purpose of comprehensively developing GREATS characteristics among the students.

• Student Activities Planning Seminar 2019

In 2019, key student projects/activities carried out are as follow:

1. “Welcoming and Introducing Life Skills Development for Public Health Freshmen”

- Prepare new students for Active Learning

- Giving orientation on course requirements, university life, and future career by alum

- Develop life skills in terms of “Media Literacy” and “Sexual Health”

- Build relationship and teamwork

2. “The 38th Rachawadee Game”

Promoting exchange of knowledge and present academic works and innovation related with public health

- Organizing “Time Bank for Elderly: Community Based Innovation” project

- Giving research presentation at the 38th Rachawadee Game

- Speech contest on the topic of "Thai Public Health to Global Stage"

- Poster contest on the topic of "Public Health Issues"

การประกวดวิดีโอสั้นในหัวข้อสุขภาพจิต "เรื่องที่ไม่เคยมีใครเข้าใจ" มหาวิทยาลัยธรรมศาสตร์ ศูนย์รังสิต

การดู 1,567 ครั้ง · 5 เดือนที่ผ่านมา

- VDO Clip contest on the topic of "Metal Health Problems"

3. “Sasuk Volunteers for Rural Development Year 6”

at Nadee District, Prachinburi Province

- Volunteer activities such as renovating playgrounds and cleaning the temple

- Educating students and local community on public health matters

- Learning local wisdom of handcrafts and herbs

- Learning the lifestyle and culture of local community

4. "The 8th Poh (Sa) Suk Camp or PHTU-Camp"

- Introducing related courses and future career path to high school students as well as building proper understanding of public health profession among participants

- Develop teambuilding among students

- Producing straw-made pillows for bed-ridden patients and single-page notebooks for Paper Ranger Foundation

5. “Young Power to Drive Public Policy of National Health Assembly”

with aim to provide students with the opportunity to develop health leadership skill and expand their knowledge and academic competency in order to keep up with current changes.

6. “Graphic Design Technique and Basic Photoshop Application Training”

to enhance health related media design and production.

7. Encourage Students to Participate in “Public Health for Society”

program by joining forces with internal and external organizations.

Encourage and Support Students to Participate in Creative Activities with aim to promote aesthetic learning experience through recreational activity, music, sports, and performances.

Student Development Activity (Lampang Campus)

Student Development Activity (Lampang Campus) for academic year 2019 was organized by Student Development and Arts and Culture Conservation Committee, Faculty of Public Health (Lampang Campus), in collaboration with Student Committee, Faculty of Public Health (Lampang Campus). This year student development activities encompassed every aspect to ensure all new graduates have developed GREATS characteristics. Key projects/activities carried out are as follow:

1. “New Undergraduates Orientation for Academic Year 2019”

to establish proper knowledge and understanding of the curriculum, course descriptions, student development activities, and student welfare.

3. “Wai Kru Ceremony and Giving Lab Coats to Junior Students”

to give freshmen a chance to express appreciation and get to know the instructors.

3. “Welcoming New Friends under the concept of Princess in PH wonderland”

to creatively build good relationship among freshmen, senior students, and faculty staffs, as well as fostering public service mind among the students.

4. “Sports Competition (Cheerto)”

to give students the opportunity to participate in various activities of the university and develop teambuilding within and outside of the faculty.

5. The 1st PHTU-Camp”

to publicize the Faculty of Public Health, Thammasat University (Lampang Campus) and building proper understanding on the nature of public health profession among high school students.

6. “Sasuk Volunteers for Rural Development Year 1”

under the concept of “Sasuk Volunteers for Development of Ban Mae Sae” at Ban Mae Sae, Papae Subdistrict, Maetang District, Chiang Mai Province. This activity allowed students the opportunity to take part in public services and learn how to serve the society as a public health worker.

“Academic Preparation and Meeting with Advisor and New Year Merit Making Ceremony 2020”

to prepare freshmen for active learning and strengthening bonds among students, instructors, and faculty staffs at Lampang Campus, including organizing new year merit making ceremony for good blessing.

8. "The 38th Rachawadee Game"

to strengthen relationship and student network within the faculty and encouraging students to participate in academic activities.

Faculty of Public Health Awards and Recognition for Academic Year 2019

Mr. Santiphot Muankid

Outstanding Morality Award presented by Student Federation of Public Health Sciences and Health Sciences of Thailand

Mr. Sivaphat Waratjatuphat

Bronze Medal for Rock Climbing Competition (double male) at the 47th University Games of Thailand held at Rangsit University

THAMMASAT UNIVERSITY
FACULTY OF PUBLIC HEALTH

Congratulations on your success

Research

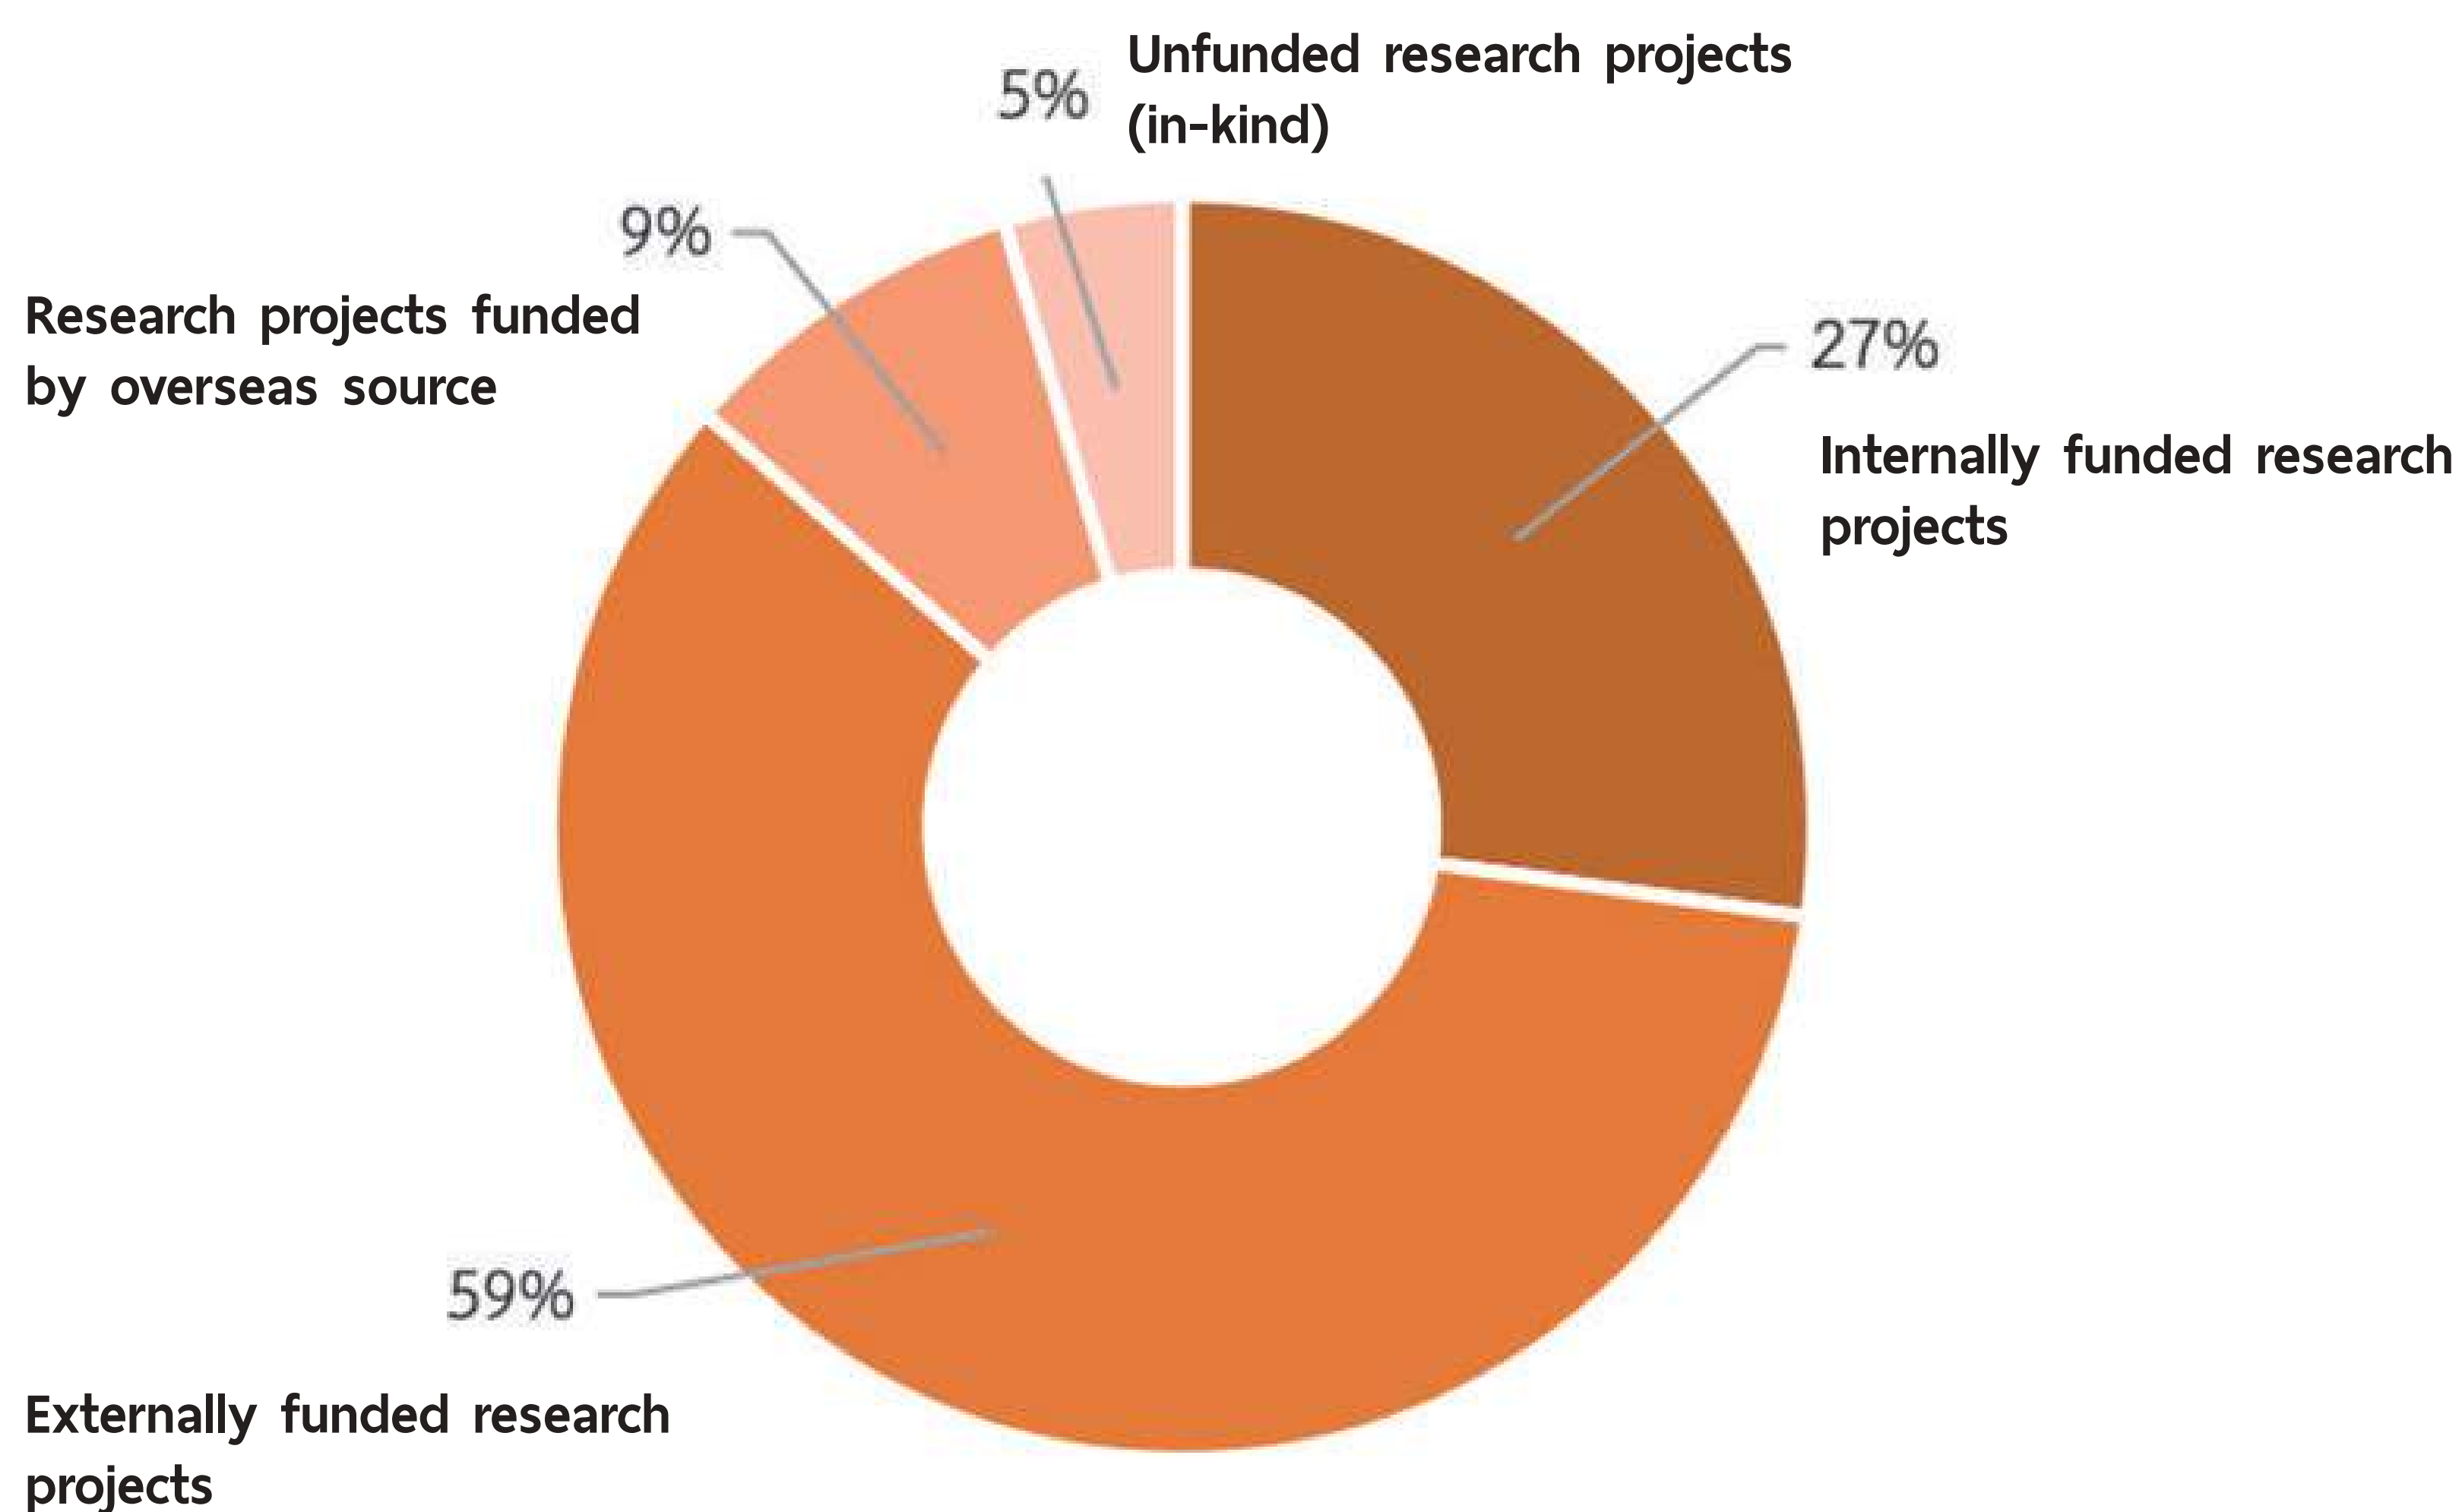

One of the Faculty's key missions in research is to develop a number of public health research that are widely accepted at national and international levels, and can be applied to public health works in the field of health promotion, environmental health, and occupational health and safety, as well as global health. The end result is that our research should eventually play an important role in solving problems within the country and other countries in Southeast Asia. Our working process also contributes to developing research and increasing the working capacity of all faculty members and every other personnel. Therefore, Research Funds of the Faculty of Public Health has been set up to allocate budget to research development, as well as encourage all personnel to produce their research continually and consistently. We also create a personnel development program to promote excellence in research, cultivate new-generation researchers by involving specialists/senior researchers in the research process, as well as encourage faculty to seek research funds from other sources both inside and outside of the country, which will eventually lead to the creation of quality academic papers and have them published in well-recognized journals at national and international levels.

Research Projects in Fiscal Year 2019: 22 Projects (Total budget: 13,869,366 baht)

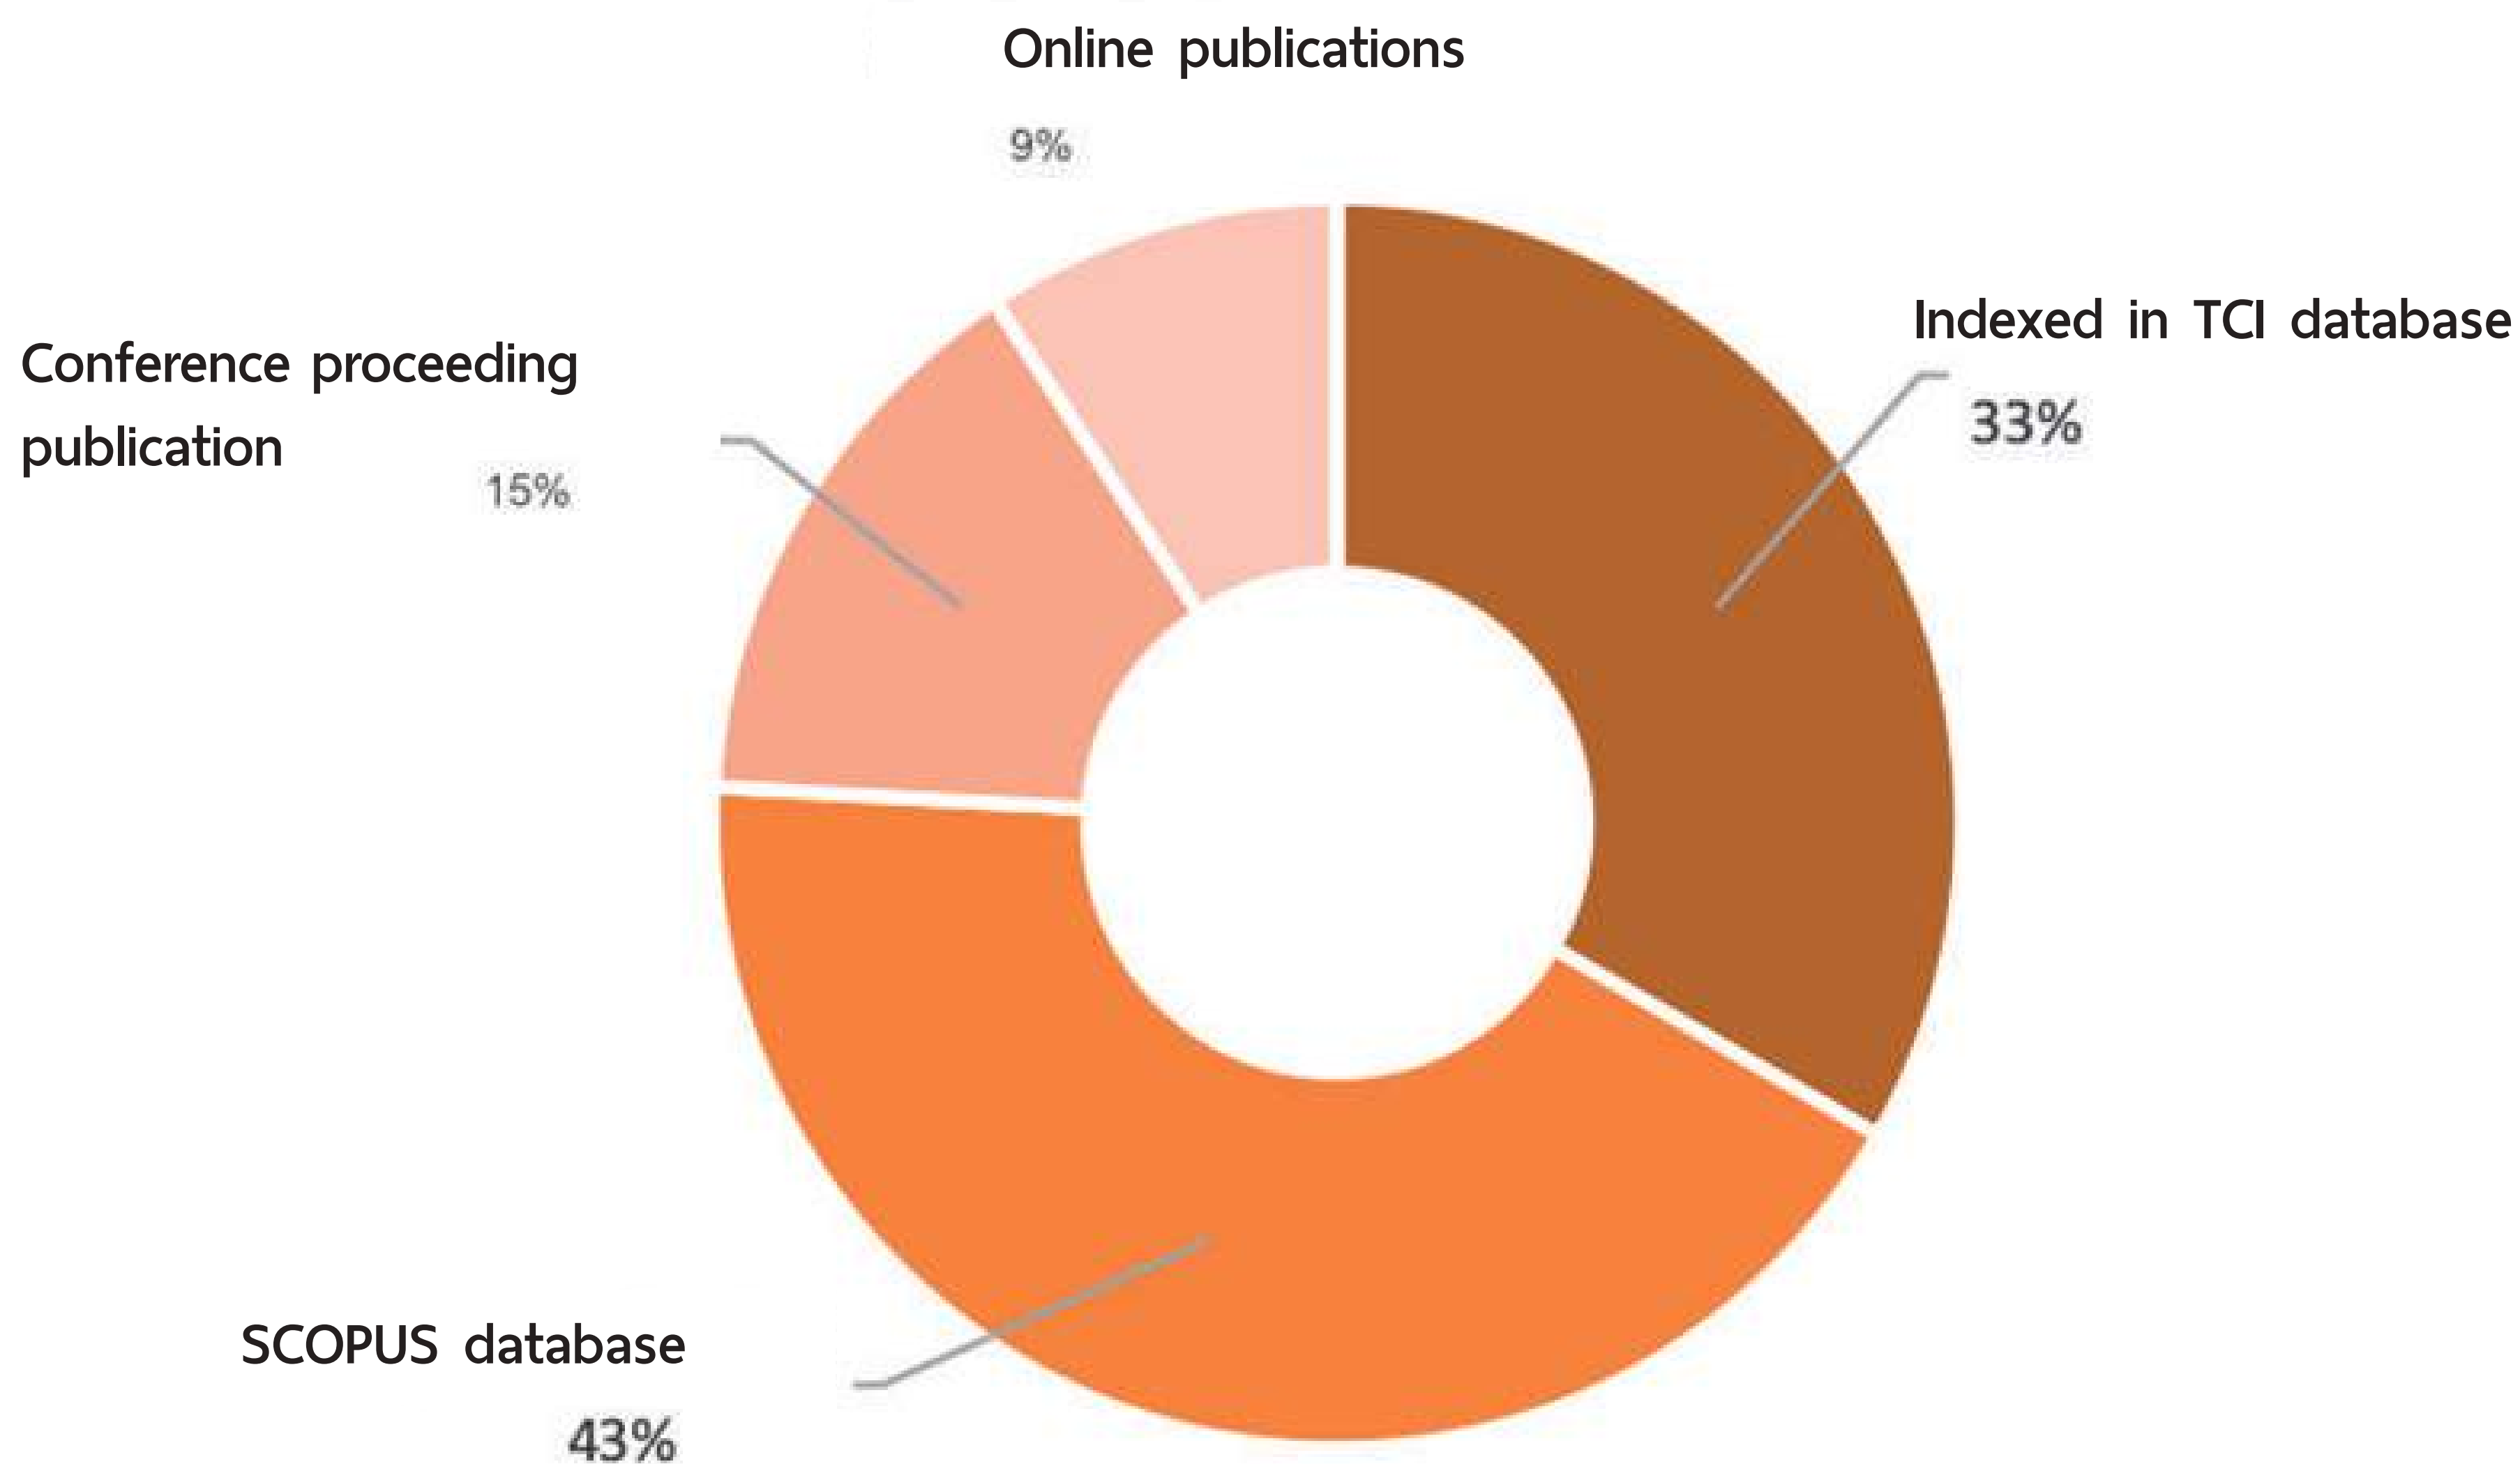

■ There are 4 types of funded research projects as follows;

Project Type	No. of Projects	Total Budget
Internally funded research projects	6	850,000 baht
Externally funded research projects	13	12,087,366 baht
Research projects funded by overseas source	2	912,000 baht
Unfunded research projects (in-kind)	1	20,000 baht

■ Faculty of Public Health Research Funding

1. Research funding granted by Faculty of Public Health Research Funding for academic year 2019 totaling 3 funds, or 450,000 Baht

No.	Author	Research Title
1	Dr.Bussarakam Titanuwat Dr.Manaporn Wongsoonthornchai	Evaluation of Greenhouse Gas Emissions from Food Waste Management - a case study of Sam Khok District, Pathum Thani Province
2	Dr.Kanjana Changkaew Assist.Prof.Dr.Pirom Noisumdaeng Dr.Ruchirada Changkwanyeeun Assist. Prof. Dr. Kridda Chukiatsiri, DVM Dr. Ruttayaporn Ngasaman Mr.Supanat Netmaneethipsiri	Plasmid analysis of Escherichia Soli Strains Producing Extended Spectrum Beta-lactamase Separated from Suckling Piglets
3	Assistant Professor Dr.Wannarat Rattanawarang	Parental Knowledge of Early Childhood Health Effects Arising from the Use of Smartphones for Entertainment

2. Scholarships for Research Presentation in Overseas totaling 5 funds, or 225,000 Baht

No.	Name	Project Name	Event Name/Location
1	Dr.Teeraphun Kaewdok (Oral Presentation)	Work Posture Assessment among Elderly Farmers in Pathumthani Province, Thailand	Osaka 33 rd International conference on "Medical, Medicine and Health Sciences" (MMHS - 2018 Osaka), 2018 Osaka, Japan Osaka International Convention Center, Osaka, Japan . 24-25 October 2018
2	Aj. Sompoke Kingkaew (Oral Presentation)	Contribution of transboundary emissions of biomass open burning to ambient particulate matter air quality in Bangkok Metropolitan Region, Thailand	The 10 th Better Air Quality (BAQ) Conference. The Borneo Convention Centre. Kuching, Malaysia . 12-16 November 2018

2. Scholarships for Research Presentation in Overseas totaling 5 funds, or 225,000 Baht

No.	Name	Project Name	Event Name/Location
3	Dr. Jiraphat Longkul (Oral Presentation)	Family Relationship Context and Sexual Behaviors Among University Students in the Northern Thailand	The Asian Conference on Cultural Studies (ACCS2019) Toshi Center Hotel, Tokyo, Japan.24-26 May 2019
4	Asst. Dr. Nantika Soonthornchaikul (Oral Presentation)	Using an Artificial Neural Networks to identify environmental and health indicators for predicting the hospital visits of children with respiratory disease	The 31st annual conference of the International Society for Environmental Epidemiology (ISEE 2019) Utrecht University, Amsterdam, Netherlands, 25 - 28 August 2019
5	Dr.Supang Wattanasoei (Oral Presentation)	Patients' Satisfaction in Chronic Kidney Diseases Clinics under the Policy of the Ministry of Public Health	The Ninth International Conference on Health, Wellness & Society / University of California at Berkeley, 2601 Warring Street, Berkeley, CA, United States . 19-20 September 2019

3. Scholarship for Student Employment as Research and Academic Work Assistance

Totaling 8 funds, or 66,720 Baht

No.	Name of Applicant	Name of Student	Employment Type
1	Assistant Professor Dr.Pantitcha Outapa	Mr. Theerapol Pankhong Ms. Parichat Somsanook	prepare secondary data using Microsoft Excel for writing academic article
2	Dr.Teeraphun Kaewdok	Ms. Supassara Sriklieng	review documents and type assigned document
3	Miss Veerapas Na Roi-et	Ms. Nittaya Sitthiprom Ms. Sunisa Dechupakarn	prepare secondary data, type document assist in sample collection, prepare secondary data
4	Dr.Supa Vittaporn	Ms. Patcharanan Udkaew	record interviews (individual/ group) and transcribe audio to text
5	Assistant Professor Dr. Saowanee Norkaew	Ms. Pornthipa Charoenphol	record and analyze questionnaire data, record and analyze data related with contamination from aerosol and volatile organic compound exposure
6	Dr.Kanjana Changkaew	Mr. Nattaphon Ngamkham Ms. Chanyaporn Chanphum	bacteria isolation, diagnose bacteria type using Molecular technique, and on-site sample collection
7	Asisstant Professor Ronnapoom Samakkeekarom	Ms. Siwaporn Jeerapat	prepare draft of research article
8	Assistant Professor Dr.Wannarat Rattanawarang	Mr. Santipoj Muenkid Ms. Supicha Pongsan	research academic articles, analyze data and type documents

Research Personnel Development Program for Excellence in Research

“Development of Creative Thinking for Innovative Problem Solving” Workshop organized on September 2, 2019, Room 530, 5th Floor, Piyachart Building, and given lecture by Khun Sasima Suksawang

“Manuscript Writing Camp” Workshop was organized as part of “Personnel Development for Promoting Research Excellence Program” from September 10 – 14, 2019, at Faculty of Public Health Thammasat University (Lampang Campus)

“Ethics Training for Human Research under SOPs Standard” was organized as part of “Personnel Development for Promoting Research Excellence Program” on March 20, 2019, from 08.30 am – 04.30 pm at Conference Room 4019, 4th Floor, Co-Operative Learning Center, Thammasat University (Rangsit Campus). The session was also live broadcasted for Faculty of Public Health Thammasat University (Lampang Campus)

Keynote speakers included:

1. Assoc. Prof. Dr. Jaakchai Jungthirapanich, MD.
2. Assistant Professor Dr. Sumalee Condo
3. Assoc. Prof. Dr. Kanwe Wiwiwatpanich
4. Assoc. Prof. Dr. Thana Khocharoenporn, MD.
5. Assoc. Prof. Dr. Sirikul Manochan
6. Assist. Prof. Dr. Laksana Laokiat

“Journal Selection Strategy and Preparation for Publication in International Journals” was organized on July 1, 2019, from 08.30 am – 04.30 pm at Computer Lab, 7th Floor, Nong Yao Chaiseri Library, Piyachat Building 1, Thammasat University (Rangsit Campus). The session was also live broadcasted for Faculty of Public Health Thammasat University (Lampang Campus).

“Basic Android Application Development” was organized from July 22 – 24, 2019, from 09.00 am – 04.00 pm at Room 530, 5th Floor, Piyachat Building, Faculty of Public Health Thammasat University (Rangsit Campus), and was given lecture by Khun Pirun Panichpon.

Development Plan for Excellence in Research and Academic Service

Research Projects

1. Initiating Research Center Enhancement Program of Faculty of Public Health (Faculty of Public Health Research Center Thammasat University) as per following details:

1.1 Establishing research development collaboration with university or agency overseas for faculty staffs

1.2 Supporting Center of Excellence in Global Health (CoE-GH)

1.3 Facilitating publication of research articles/ international academic works of the Faculty of Public Health, Thammasat University

1.4 Supporting interdisciplinary research collaboration for innovation creation

1.5 Research development collaboration with international organizations via Bualuang ASEAN Fellowship

1.6 Other relevant works

Academic Service

1. Expanding network of collaboration, promoting and supporting social services by joining forces with local and international agencies

2. Sustainably expanding academic services of Center of Occupational Health, Safety and Environment established by the Faculty of Public Health, Thammasat University

3. Promote the establishment of public health community model

Academic Service

As part of the established policy, the Faculty of Public Health, Thammasat University, takes pride in serving the society and local community through provision of academic services for both internal and external organizations in various forms according to areas of expertise of the faculty, such as health promotion, in hope to encourage changes in terms of behavior from which occupational health, safety and working environment related problems commonly arise in both public and private sectors, including ensuring legal compliance in respect to determination of standards for administration and occupational health, safety and work environment management, such as measurement of heat, light, noise, and chemicals, and giving advice on various matters related with personnel health and environmental health, especially among nearby industrial plants. This is achieved by providing certified laboratory analysis services such as analysis of bile / wastewater quality, air quality and food quality.

Faculty of Public Health provides academic services to the public through establishment of Center for Promotion and Development of Community Public Health, Environment and Safety as part of its goal to uplift the quality of life and surrounding environment within local community. By recognizing the importance of academic service provision to the public, the Faculty of Public Health also established and maintained collaboration with Prasart Thong Subdistrict Municipality, Bang Pra-in District, Phra Nakhon Si Ayutthaya Province, to build model community as part of “Promote and Support Academic Services to Strengthen Society and Create Academic Collaboration Network” program, including academic collaboration with Kukhwang Municipality, Pathum Thani Province, as well as expanding collaboration network by joining forces with Nakhon Lampang Municipality and Koh Ka Subdistrict Municipality, Lampang Province. The faculty also established academic collaboration with Department of Health, Ministry of Public Health, for carrying out “The 4th Environmental Health and Health Promotion Executives Program”

for four consecutive years not to mention collaboration with private sectors namely Industrial Estate Authority of Thailand, Faculty of Commerce and Accountancy, Thammasat University, and Safety and Health at Work Promotion Association (Thailand) in organizing “Organization Executives Mini MBA: Innovative Sustainability in Safety, Health, Environment & Energy Management (SHE & En)” which aims to provide academic service to public health executives and personnel of public and private sectors, including organizing “Promotion and Development of Community Public Health, Environment, and Safety Program” at both Rangsit Campus and Lampang Campus for providing free academic services and carrying out the following projects: “Study of the Production of Renewable Energy Fuels from Food Industry Sludge and Waste Sludge (Thai Glico Company Limited)” and “การออกแบบ Infographics Design for Public Health and Environmental Works” to provide academic services that can be integrated and developed in teaching and conducting research of the Faculty of Public Health, Thammasat University.

The operating results of Center of Occupational Health, Safety and Environment established by the Faculty of Public Health, Thammasat University, for fiscal year 2019 are as follow:

โครงการตรวจวิเคราะห์ทางห้องปฏิบัติการ	จำนวน 5 โครงการ	65,703	บาท

โครงการอบรมเชิงปฏิบัติการ (ประเภทสามัญ) และ โครงการอบรมเจ้าหน้าที่ความปลอดภัยในการทำงาน (จป.)	จำนวน 8 โครงการ	2,754,350	บาท
รวมงบประมาณทั้งสิ้น		8,548,605	บาท

Quality Assurance

Faculty – Level Quality Assurance in Academic Year 2019

Since 2015, the Faculty of Public Health has adopted Education Criteria for Performance Excellence (EdPEX) as framework to further improve its organizational management quality. Later in 2019, the faculty joined as member of TU-EdPEX200 program organized by Thammasat University in hope to encourage and support internal organization to participate in the program and enabling them to pass EdPEX200 evaluation criteria. There were a total five internal organizations taking part in the program.

In the same year, the Faculty of Public Health organized activities to promote participation and understanding, including taking part in the 7th EdPEX hosted by Office of the Ministry of Higher Education, Science, Research and Innovation. In 2019, a total of 87 participants joined the program and only 20 were selected through preliminary screening. Among this was the Faculty of Public Health which also made it to the SAR round, marking the first time in history that an organization under Thammasat University had joined the program and had been selected during preliminary screening.

Evaluation Score by Key Performance Indicators 1 – 6 Academic Year 2018

Faculty of Public Health conducted curriculum quality assurance for academic year 2018 from September 4 -23, 2019, revealing an overall score of 3.53 (excellent level). The overall scores by course are as follow:

Evaluation Score by Key Performance Indicators 1 – 6 Academic Year 2018

Curricula	Component											Mean		
	1 Standardization	2.1 Quality of Graduates as per TQF	2.2 Undergraduates Employment /Published Works of Postgraduates	3.1 Student Admission	3.2 Development and Support	3.3 Outcome for Students	4.1 Instructor Administration and Development	4.2 Quality of Instructors	4.3 Outcome for Instructors	5.1 Course Details	5.2 Instructor Management and Lesson Planning		5.3 Student Evaluation	5.4 Evaluation under TQF

Outstanding Performance

Produce public health graduates of professional excellence, leadership and creativity

As part of ASEAN University Network:Health Promotion Network, representatives of the Faculty of Public Health, Thammasat University, jointly present projects and activities organized by Thammasat University with aim to achieve the goal of “Thammasat Healthy University” from between August 19 – 22, 2019, at Novotel Manila, Cabao, Quezon City, Philippines.

On November 25, 2019, the Faculty of Public Health together with Student Affairs Division organized an activity under the concept of “TU Say No To Sexual Harassment on Campus We are ‘Generation Equality’” at Social Studies Learning Center, Thammasat University (Rangsit Campus). The event included an exhibition which aims to promote gender safety and understanding, a discussion panel on how to promote gender safety and understanding at national policy level and practices applied within Thammasat University campus, and health equity.

Generate research and bodies of knowledge that is up-to-date and in line with current public health issues

On September 18, 2019, Thammasat University organized an honorary lecture by Dr. Emeritus Hiroshi Kida, DVM, PhD, Head and Specially Invited Professor of Hokkaido University Research Center for Zoonosis Control and Honorary Doctorate in Public Health, Thammasat University 2016, on the topic of “Are we prepared for pandemic influenza?”. The event which took place at Thammasat University (Rangsit Campus) was held to celebrate the institute’s 85th anniversary and to establish MOU agreement for mutual exchange and development of public health knowledge.

Promote good health, safety and well-being at local, national, and global level of society

The Faculty of Public Health, Thammasat University, organized a special seminar on “Health Security and Updated on Wuhan Coronavirus 2019 & Pandemic Condition”.

On February 5, 2020, Dr. John MacArthur, Director of Thailand MOPH - U.S. CDC Collaboration (TUC) attended the event as keynote speaker to share some useful knowledge and understanding on health security as well as emerging and re-emerging infectious diseases among the students of Global Health Program, Faculty of Public Health, and interested participants. The session was specifically focused on novel coronavirus 2019 (2019-nCoV).

On June 12, 2019, the Faculty of Public Health, Thammasat University, organized a seminar session on the topic of “Laemchabang Port Explosion and ‘Hazardous Chemicals’ Management” at Hutasingha Conference Room, Thammasat University (Tha Phra Chan Campus). The event was attended by the country’s most renowned keynote speakers who kindly share their experiences and opinions on safety issues and how to ensure public safety in the future.

The Faculty of Public Health, Thammasat University, joined forces with International Committee of the Red Cross (ICRC), National Health Security Office, Ministry of Public Health, Medical Services Division, Department of Corrections, and Department of Juvenile Observation and Protection in organizing “Detention Public Health System Administrative Team Meeting No.1” under the concept of strengthening public health systems in detention in hope to develop related personnel competency in terms of how to properly give care, support, protection, and promote health recovery among the detainees, and sustainably maintaining the same practice throughout the network.

PUAY Park for the People

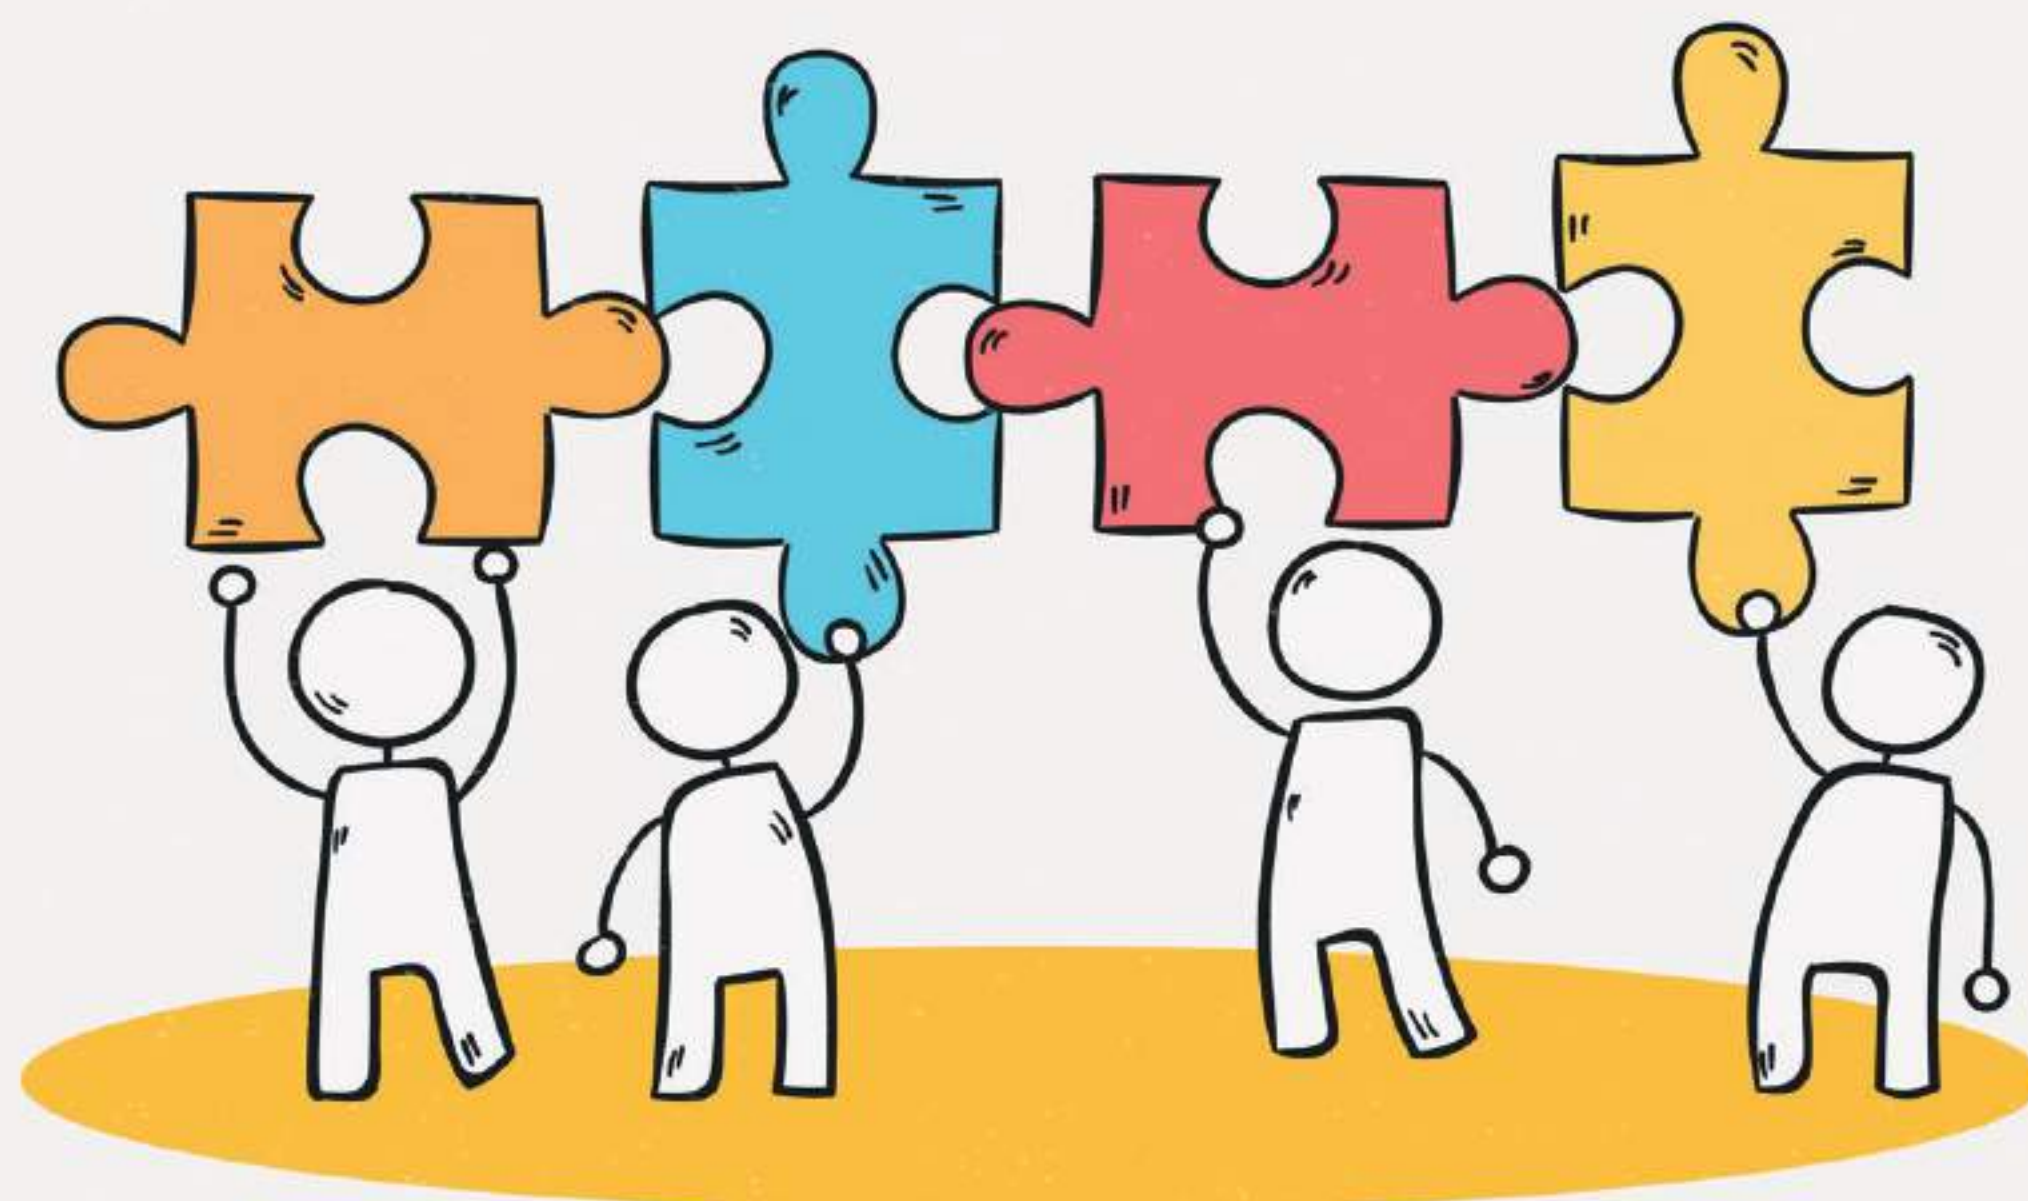

Thammasat University Rangsit Campus

The Puey Ungphakorn Centenary Hall and Park building was built on the occasion of the 100th anniversary of Professor Puey Ungphakorn in 2016. The roof of the building was designed as an organic vegetable garden and sky park, the largest in Asia, and second largest in the world. The Puey Ungphakorn Park opened on December 10, 2019. The Puey Ungphakorn Park was received the first prize in architecture "Architizer A + Awards 2020" The prize awarding of the committees by Jury Winner and The prize awarding by Popular Vote in a concept of Landscape & Planning-Public Park.
