“Long Live the King”

*H.M. King Maha Vajiralongkorn
Bodindradebayavarangkun*

“ When citizens are in poor health, the nation cannot advance.

That is because one of the nation’s most important resources is its people ”

HM King Bhumibol Adulyadej. Rama IX

A Message from the Rector Thammasat University

Twelve years after its establishment, the Faculty of Public Health has made major breakthroughs in all aspects, from its education, to community service, research, student's extracurricular activities, and particularly its curricula which include both undergraduate and graduate degrees in both Thai and international courses. The school also expanded education opportunities to people in provincial areas by starting its courses in Thammasat University Lampang Campus. It has also built up recognition for its research on both national and international level.

Until now, the Faculty of Public Health has been successful in working in accordance with the University's policies to reinforce academic strength of its students, faculty, staff, and alumni. The faculty also has proved itself with its quality performance, equality, and its identity as "public health for the public good".

In its 12-year anniversary, I would like to show my appreciation and support for the team of executives, staff members, students, and the alumni of the Faculty of Public Health who have been fully dedicating themselves to the school. And lastly, I wish everyone success in life and also in their mission to develop this country in all aspects.

(Professor Dr. Somkit Lertpaithoon)
Rector, Thammasat University

A Message from the Dean

Faculty of Public Health, Thammasat University

The Faculty of Public Health, Thammasat University, was established in 2005 (12 years ago). Since its foundation, the faculty has been devoting to ceaselessly advance its education, research, and community service in accordance with its own policies and missions as well as the university's strategic plan. We guide our students to have Global mindset, Responsibility, Eloquence, Aesthetic appreciation, Team leader, and the Spirit of Thammasat (GREATS). We support our faculty to build a strong team teaching skill while also provide opportunities for our school staff to build their capacity, which will enhance their capability to drive our mission.

Our performance in the past year, as also delineated in this report, could not be achieved without proactive cooperation of everyone including the executives, faculty, staff, and students, who all have been together help us propel and succeed. I would like to express my gratitude towards our partners both inside and outside the University as well for their kind support as always. I am also highly grateful for the University's executives who have been supporting the Faculty of Public Health for us to be able to operate in accordance with the University's policies and missions in order to achieve our ultimate goals.

Finally, I would like to wish our executives, faculty, staff members, and all students in this faculty, a success in improving our school and uplifting our standard of our identity, "public health for the public good".

5.55

Dr. Chaityuth Chavalitnitikul
Dean, Faculty of Public Health

History of the Faculty of Public Health

Thammasat University

Prior to the foundation of the Faculty of Public Health, there were only four health-science-related faculties in Thammasat University, which were the Faculty of Medicine, Faculty of Dentistry, Faculty of Nursing, and Faculty of Allied Health Sciences. The university, thus, saw the importance to establish the Faculty of Public Health in order to produce public health personnel which were highly needed. On the 6th of July 1996, during the Ministry of University Affairs' second annual meeting, the meeting members approved the project to establish the faculty to be part of the 7th and 8th Higher Education Development Plan (1992-1996 and 1997-2001, respectively). However, the establishment was postponed due to Thailand's financial crisis in 1997. On the 14th of October 1997, the cabinet resolved to postpone establishment of all new public agencies.

Later in 2000, Thammasat University reviewed the project again and issued an order 1052/2543 on the 5th of July 2000, to commission a committee on establishment of Faculty of Public Health to review the project which was included in the 8th Higher Education Development Plan (1997-2001). Between January 2002 and April 2003, the committee studied the possibility of the project which resulted in a conclusion that the Faculty of Public Health should provide education for both undergraduate and graduate degrees, in order to produce more public health workforces who are equipped with knowledge and experience for preventing and controlling diseases as well as promoting good health and hygiene of the citizens. The result also suggested that the school should design its education and research to be different from other institutes by ensuring integration and collaboration between different fields, especially the fields that the university is well known for such as sociology, management, commerce, economics, and laws. The study also hinted that curricula should be designed in compliance with the country's development directions. However, during the 9th Higher Education Development Plan (2002-2006), the Office of the Higher Education Commission informed all universities and institutes that the cabinet's resolution on postponing establishment of all new public agencies was still in effect, and that if any university saw that it is highly necessary to found a new organization/agency, the case shall be reviewed and approved by its university council. The newly established organization, then, shall be an independent organization under the university's monitoring. Eventually, Thammasat's university council approved the project to establish the Faculty of Public Health as an independent organization under the university's monitoring on 29th of August 2005 during its 8th annual meeting. On the 1st of September 2005, the Department of Health Science, Faculty of Science and Technology, Thammasat University was then reformed as Faculty of Public Health. The faculty starting running officially that year while still providing only one degree (Bachelor of Science in Health Science). The degree program was the same program as provided by the Faculty of Science and Technology since 1986. The program was temporarily closed in 2007. Later on when the programs were introduced to Thammasat University Lampang Campus, starting with Master's degree program in 2014 and Bachelor's degree program in 2016.

The Faculty of Public Health has been ceaselessly developing its curricula and programs. Its programs are being provided in both Rangsit and Lampang Campus. For Bachelor of Science degree program in public health, there are three majors in Rangsit Campus: 1) Occupational Health and Safety, 2) Health Promotion, and 3) Environmental Health; and three majors in Lampang Campus: 1) Community Health 2) Environmental Health 3) Occupational Health and Safety. For Master of Public Health programs, five majors are being provided in Rangsit Campus: 1) Environmental Health Management, 2) Occupational Health and Safety Management, 3) Health Promotion Management, 4) Public Health Services Management, and 5) Public Health Information Management; and two majors in Lampang Campus: 1) Health Promotion Management, and 2) Environmental Health Management (the programs are conducted on Saturdays and Sundays). For international programs, there are two degree programs: 1) Master of Public Health in Global Health, and 2) Master of Science - Doctor of Philosophy in Occupational & Environmental Health with three Concentrations: 1) Occupational Health, 2) Ergonomics and Safety, 3) Environmental Health.

History

of the Faculty of Public Health
Thammasat University

Vision

To become a leading academic institute in public health among ASEAN countries

Mission

1. Produce public health graduates that are well-equipped with knowledge, capability, virtue, and are well acknowledged by the public.
2. Generate research and bodies of knowledge in the field of public health that are well acknowledged on both national and international level.
3. Serve as a center for community services regarding public health of Thailand, as well as strengthen national and international networks.
4. Support and enhance Thai culture, promote better understanding of cultural differences by using education as a tool.

Philosophy

Develop and produce public health graduates who have honesty, public mind, and social accountability for the public.

Core Value

Knowledge, Unity, Virtue, Visionary, and Health Promotion

Student Affairs

Faculty of Public Health

Undergraduate Students, Rangsit Campus

Awards

Senior students from environmental health major won the first runner up and an honorable award from a “New Generation New Communication” contest held by Thailand Environment Institute in the category of “urbanization and climate change”. The activity is part of the extra-curricular activities of Air Pollution Control class whose one of the objectives is to develop students’ skills on media production, communication, coordination, and social awareness. Mr. Sompoke Kingkaew, lecturer of the class, was the mentor of both of the winning team.

Study Visits

All 3 majors in the Bachelor of Science degree program in public health, (Occupational Health and Safety; Health Promotion; 3) Environmental Health) have proposed the “study visit project” with the objectives to enhance student’s knowledge, understanding, and experience through other organizations and strengthen academic capability. The proposed project was approved. It is well aligned with the national framework for higher education and is suitable for building students’ occupational capacity which will lead to both personal and national development.

Field Work

The objectives of the Bachelor of Science degree program in public health are to advise students to be knowledgeable and capable of combining scientific knowledge from different areas to analyze, plan, and solve public health problems, as well as to become leaders in research and public health development. The program requires its senior students to go on a field work in places such as industrial plants, local administration office, sub-district health promotion hospital. The field work is scheduled between 14 February to 12 May 2016.

Public Health Seminar

The faculty saw the importance of the application of knowledge obtained in classes. It also monitors regularly the related academic topics for the seminars of senior students. Seminar’s theme ranges from occupational health, safety, and environmental health, and health promotion. We invite experts from various backgrounds to the seminar which is part of the class “Seminar in Public Health” (PB491)

Basic Fire Training

On the 8th-9th April 2017, the PTT Public Company Limited held a basic fire training program for students in the Faculty of Public Health. The objectives were to provide students basic knowledge on basic firefighting for them to be able to extinguish fire in case of emergency. The training program was divided into two parts (basic theory and workshop).

Health Promotion Major Students on a Field Trip

The field trip was held for students of health promotion major in order to deepen their knowledge and understanding of health promotion project management in every step throughout the process (community analysis, theory, evidence-based analysis, strategic planning, tool design, media utilization, and evaluation) that they may apply what they have learned to solve health problems in real settings.

Undergraduate Students, Lampang Campus

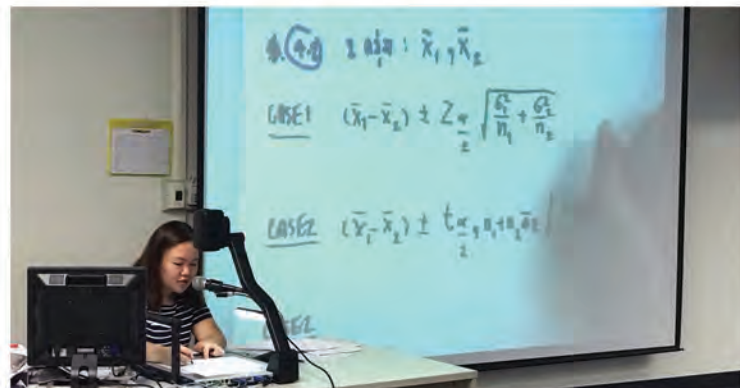

Advisors Meet Students Initiative

The Faculty of Public Health, Lampang Campus, has initiated “Advisors Meet Students” initiative in order to create chances for advisors to know about their students’ situations and study issues. We also hope the initiative would serve as a good opportunity for advisors and students to bond and have better relationships which would lead to better guidance in both academic and personal life.

Pal Tutor Initiative

The Faculty of Public Health, Lampang Campus, has initiated “Pal Tutor” Initiative in which students who scored highly in Statistics course help their peers by being tutors, teaching and advising their friends on the subject.

Supplementary Class for Basic Math and Science (Calculus, Biology, and Physics)

The Faculty of Public Health provided supplementary math and science classes to prepare students for the final exams. The initiative was successful especially for the Calculus class in which all students who enrolled the supplementary class passed the final exam.

Student Affairs

Faculty of Public Health

Graduate Students, Rangsit Campus

Thesis and Independent Research Consultation Clinic

The clinic is run by Associate Professor Chaweewan Boonsuya who assists students by giving advice on their theses and independent research.

Academic Presentation in National and International Conferences

Ms. Samanya Mookasa, graduate student of the Faculty of Public Health, presented her work in “The 8th International Conference on Public Health among Greater Mekong Sub-Regional Countries 5-6 November 2016 Phnom Penh, Cambodia” from 4-7 November 2016 at Phnom Penh, Cambodia.

Ms. Ratchadaporn Petchngam, graduate student of the Faculty of Public Health, presented her work in “The National Ergonomics Conference 2016” which was held from 15 to 17 December 2016 at the Faculty of Medicine, Thammasat University.

Field Trip: “Public Health Capacity Building Program”

The capacity building program was held between 23 to 25 September 2016 in Samut Sakhon and Samut Songkhram to enhance students’ capacity and experience on public health profession via research, project analysis, seminar, and community service. The program also provided students opportunity to apply their theoretical knowledge into solving real public health problems in real settings, exchange their past experiences, as well as get updated on the current public health situations.

Training Course: “Data Preparation for Assessment” and “Research Tool Development and Evaluation Techniques”

A training course on research tool development and evaluation techniques was held on 14 January 2017 at Room 530, 5th floor, Piyachart building to support their capacity on their thesis and independent research.

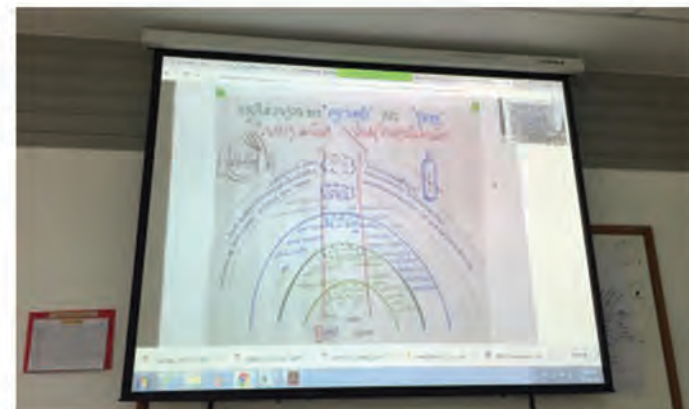

*Graduate Students,
Rangsit Campus*

Celebration for the First Graduation Class from Lampang Campus

Curriculum Committee held a heartwarming celebration for first graduation class from Lampang Campus (graduation class of 2015) on 26 November 2016 at Thammasat University, Lampang Campus.

WebEx Class

Faculty of Public Health, Lampang Center, has introduced WebEx system for long-distance education since 2016 to expand education opportunity for students in distant areas and other provinces such as Nan. It is hoped that students in the long-distance education program will be able to apply their knowledge to develop their community and connect with other organizations and networks.

International Study Visit

Faculty of Public Health, Lampang Campus, organized an international trip to Fukuoka, Japan during 5-6 March 2016, for students to attend the "Fukuoka Active Aging Conference in Asia Pacific 2016". The trip was an opportunity for students to present their work on an international platform in which they could exchange knowledge and experience with other researchers, build up their academic capacity for their future research to be acknowledged internationally.

Seminar on Thesis and Independent Research Development

Faculty of Public Health, Lampang Campus, has organized a seminar on thesis and independent research development during 20-12 January 2017 at Nan Community College. Participants was guided and mentored by the faculties who critically and constructively criticize their theses' topics and progress.

Domestic Study Visit

Faculty of Public Health, Lampang Campus, organized field trips to external organizations. i.e, Thai Health Promotion Foundation and Nonthaburi Municipal, for our students to enhance their knowledge, understanding, experience, exchange their views with people in the community and utilize what they have learned from class in real setting.

Student Affairs

Faculty of Public Health

Student Development Activities

Student Development Activities are managed by the student affairs committee which is commissioned by the Faculty of Public Health. The Faculty of Public Health also organized an election for student committee to specify the direction of student development of the school which goes in line with the University's policies and strategies. The student development activities were also integrated with regular classes to promote students' capability in all aspects, i.e. academic skills, sports, health promotion, public mind, ethics, arts and culture, etc. The followings are some projects that were highlights of the past year (2016).

Workshop on Occupational Health and Safety Management Systems (TIS 18001) and Environment Management Systems (ISO 14001: 2015)

The workshop was held during 2-3 and 7-8 June 2016 for senior students in order to prepare students with basic knowledge regarding Occupational Health and Safety Management Systems (TIS 18001) and Environment Management Systems (ISO 14001: 2015).

Student Activity Development Seminar (Education Year 2016) with Newly Appointed Student Committee

The seminar was held on 10-12 June 2017 in order to develop student activity plan to be in accordance with the Faculty and the University's policies. It was also a great opportunity for the old and new committee to exchange their views. Students were also taught about education quality assurance so that they will be able to utilize the knowledge and apply with their own activities or projects (academic work, sports, health promotion, public mind, environment, ethics, etc).

Planting for the Queen Project

The project was held on the 6th of August 2016 at Bangluang temple, Chinanawaram temple, Tian Tawai temple in Pathumthani. The project's objectives were to provide an opportunity for all students (both undergraduate and graduate), teachers, staffs, and alumni to together learn local wisdom, art, and culture of Pathumthani. Activities include Buddhist ceremony and tree planting to rever Her Majesty Queen Sirikit on the occasion of her 84th anniversary.

Wai Kru Ceremony at the Faculty of Public Health and at Thammasat University, themed "Gratitude and Respect for Teachers"

The ceremony took place on 15th September 2016, the purpose of which was to provide platform for students of the Faculty to pay respect to the teachers who dedicated themselves to the success and achievement of the Faculty and of Thammasat University. The ceremony was also to continue the Thai tradition and custom. For 2016, the Faculty won the Pedestal Tray Competition (decorative category) during Wai Kru Ceremony.

Creative Welcome Project

The project was organized during 2-4 September 2016 at Faculty of Public Health, Rungsit Center.

It aimed to provide opportunities for new students, along with old students, to participate in creative and safe activities, as well as empower them to have public mind and social accountability. Students also learned how to take care of their own health (body, mind, spirit, emotion, and social), plan their work systematically. Other activities include advising on education, life in campus, and potential career paths.

Welcome Project

Mobile Medical Unit on Mahidol Day

The Faculty of Public Health, together with other health science schools in Thammasat University, organized a mobile medical unit on 25 September 2016 at Thaklong city municipality in Pathumthani to provide services such as health check-up, dentistry, rehabilitation and other medical treatments for people in the community. The Faculty of Public Health provided services such as eyesight test, professional scales, advice on prevention and health promotion, garbage management, exercise, especially for the elderly.

The 35th Public Health Relations Games (Yoongthong Games)

The Faculty of Public Health, Thammasat University, as appointed by the Public Health and Health Science Student Association (PHSA), hosted the 35th Yoongthong Games during 20-21 January 2017. The event's objectives were to strengthen networks between public health students which hopefully would lead to vigorous exchange on academic work and more collaboration on services for the public. The games was also an opportunity for all students from 16 public health institutes to show their condolences on the passing of His Majesty King Bhumibol Adulyadej through various activities such as play, cheerleading, card stunts, etc.

The 5th Summer Camp: "Health Town: the Mysterious City and the Lost Key"

During 10-12 March 2017, the Faculty of Public Health held a summer camp participated by a hundred high school students who were selected from applicants nationwide. The camp aimed to promote participants' understanding of the strength and identity of the Faculty of Public Health, Thammasat University, regarding its education and career path. Participants also learned how to make straw pillows for the elderly and bedridden patients, finger contracture cushions for contracture or paralyzed patients, and artificial breasts for breast cancer patients, which were sent to Thammasat University hospital. Students who had to travel from afar to participate were subsidized 1,200 baht each for transportation fee.

Host of the Public Health Relations Event

The Faculty of Public Health was honored to be the host of the Public Health Relations Event during 27 March to 4 April 2017. The event was held in order to promote student networks among schools related to health science in Thammasat University through activities such as sports, volunteer activities, and other recreations.

Student Exchange Program (Thailand-Vietnam)

The Faculty of Public Health, Thammasat University, has signed an MOU with Hue University of Medicine and Pharmacy (HUMP). According to the MOU, future collaborations between the two universities include collaboration on education and research. Activities under the MOU also include student and staff exchange program which is hoped to create a momentum for further international collaboration as well as cultural exchange between the two countries.

The 2nd TU Health Fair

The 2nd TU Health Fair was held on 25 April 2017, as collaboration between the university and the Thammasat University Student Union (TUSU). The fair was sponsored by the Thammasat University Hospital. It aimed to promote health awareness among the university's personnel, students, and the public. Activities include holistic health promotion activity (physical, mental, social, and spiritual health) and healthy flea market.

5	The Faculty of Public Health	Second runner-up for Best Play in the 35 th Yoongthong Games
6	The Faculty of Public Health	Won the first prize for the best Teacher's Day flower tray arrangement in two categories: 1) Beauty and 2) Faculties' Favorite

A Plan for Excellence

- 1) Develop management system to support education
 - ◆ Online evaluation
 - ◆ IT system to support education and improve learning environment, e.g. WebEx E-learning
 - ◆ Make management system more flexible for various needs of users and students, e.g. registration, regulations, or subject timetable
- 2) Develop operational manual for all tasks
- 3) Operationalize team teaching to create active learning
- 4) Revise curricula to focus more on experience-based learning and service learning
- 5) Develop database of alumni and current students
- 6) Publish newsletters to promote news of school's activities more often
- 7) Strengthen networks and good relationships between the faculties, staffs, alumni, and current students

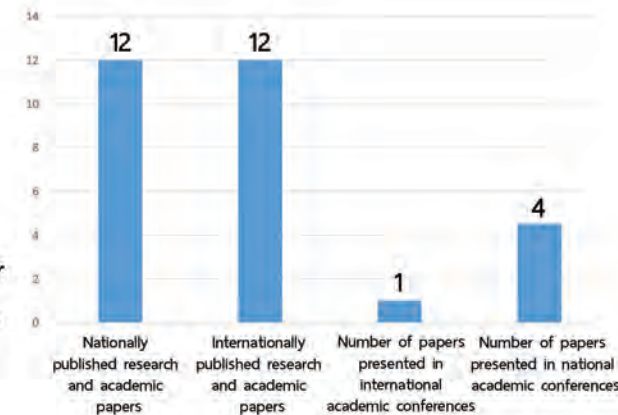

Research and Academic Services

Faculty of Public Health

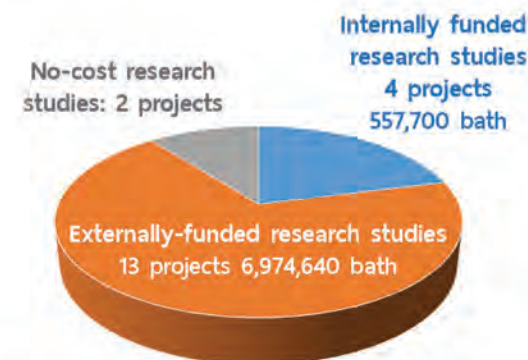

1. Publication (research and academic papers)

- ◆ Nationally published research and academic papers 12 papers
- ◆ Internationally published research and academic papers 12 papers
- ◆ Number of papers presented in international academic conferences 1 paper
- ◆ Number of papers presented in national academic conferences 4 papers

2. Research-19 research studies were conducted in 2016:

- ◆ Internally funded research studies: 4 projects
(Total fund: 557,700 baht)
- ◆ Externally -funded research studies: 13 projects
(Total fund: 6,974,640 baht)
- ◆ No-cost research studies: 2 projects

3. Citations of the works by faculty members in 2016

131 works were cited during the period of 1st January to 31st December 2016.

4. Number of faculty members received overseas professional development: 1 academic staff member.

Academic Services

Laboratory analysis 17 projects	237,850	baht
Occupational health analysis 5 projects	71,500	baht
Consultancy 11 projects	2,937,460	baht
Others 2 projects	150,000	baht
Training 5 projects	296,200	baht
Total	3,693,010	baht

Future Actions for Organizational Excellence

Research

1. Support faculty members in researching into new innovations and creativities with possible business viability.
2. Collaborate with national and international institutions on large-scale research projects, which contribute to positive changes and improved health conditions.
3. Create and build skills of new researchers within the Faculty to be able to receive external funding to conduct research.
4. Promote and support national and international publishing and dissemination of academic and research publications by members of the Faculty.
5. Establish a research data management body to support faculty members in conducting research.

Academic Services

1. Strengthen partnerships with business sector through needs-based training, standard occupational health laboratory testing and analysis.
2. Promote and support faculty members in providing academic services in areas relevant to public health, initiating problem-solving environment and using the results for academic development.
3. Develop capacity of Academic Support Staff to better deliver support services to students and faculty members.

Strategies, Quality Assurance and Finance

Faculty of Public Health

4. Teachers	3.67	Good	2.72	Average	3.00	Average	2.72	Average
5. Curricula & student evaluation	3.25	Good	3.25	Good	3.00	Average	3.00	Average
6. Supplementary materials	3.00	Average	3.00	Average	2.00	Poor	2.00	Poor
Average indicators/components	3.30		2.95		2.73		2.65	
Overall evaluation	Good		Average		Average		Average	

Future Actions for Organizational Excellence

- ◆ The Faculty of Public Health implemented the Education Criteria for Performance Excellence (EdPEX) for academic year 2015 to systematically improve organizational performance, starting from education management, academic administration, and research. The EdPEX approach focuses on stakeholders such as customers, students, and other groups and values equal contribution to learning of all stakeholders.
- ◆ Goals under EdPEX are:
 - 1) To improve the Faculty's performance, efficiency, and results-orientation;
 - 2) To increase dialogue among stakeholders including faculty members, students, customers and other relevant stakeholders for improved performance;
 - 3) To apply EdPEX to create common understanding and management for better performance.
- ◆ 3-year EdPEX goals in organizational development:
 - 1) Year 1 – improve key operational systems and customers' feedback
 - 2) Year 2 – develop strategic plan and knowledge management process
 - 3) Year 3 – develop database and information technology, human resources and efficiency.
